Skills

- Proficient in programming language such as Java basics.
- Excellent problem-solving and analytical skills.
- Strong communication and teamwork abilities.
- Self motivated and eager to learn new technologies.
- Time management.

Projects

SOLAR POWERED AIR QUALITY MONITORING AND FILTERING SYSTEM:

The air monitoring system overcomes the problem of the highly-polluted areas which is a major issue. By utilizing solar energy, it addresses air pollution concerns while promoting clean and healthy environments for individuals and communities. Implementing such systems can contribute to the improvement of air quality and ultimately lead to a healthier and more sustainable future.

AUTOMATIC ZEBRA CROSSING:

This project aims to protect the pedestrian from road accidents. In this work the barricades are placed on the zebra crossing when the traffic light flashes red, the piston actuates the barricades and it is automatically lifted. When the Green signal flashes, the barricades lay down.

FIRE ALARM:

The main objective of this project is to discover fire in their early development & warns the people by the alaram to protect against the risk.

Language

English , kannada , Hindi

Internship

Designing & Installation of Solar Photo-Voltaic Systems at Eltron Energy Private Limited.

Completed an internship in JAVA at ETHNUS.
