

Vishal S Lakshmeshwar

DevOps Engineer

E-Mail: svishalron@gmail.com

Ph No: +91- 8867385356

Over 3 Years of Experience in Information Technology includes Systems Administration, DevOps management which include Packaging, Deploying and Application Configurations

Tools/Skills:

System Administration	: Windows & Linux.
Cloud Technology	: Amazon Web Services(AWS).
Version Control Systems	: Git/Git Hub.
Configuration Management Tools	: Ansible.
Build tools	: Maven.
CI/CD Tools	: Jenkins.
Scripting Languages	: Yaml,Groovy
Database	: Amazon aurora and MySQL.
Monitoring Tool	: Cloudwatch, Sonarqube
Cloud Automation	: Terraform
Container Tools	: Docker & Kubernetes.
Client Operating System	: Windows XP,7,8,8.1,10.
Server Operating system	: Linux ,Windows 2008 Server & R2, 2012 Server & R2,

Work Experience

- Working as a Devops Engineer at Grorich Tent systems Oct 2020 to Till date.

Academic Credentials:

- B.Tech (Aeronautical Engineering) from Srinivas institute of Technology Mangalore with (7.91 CGPA)
- PUC from Karnataka PU Board with 87%.
- S.S.C from Central Board of Secondary Education with 9.2 CGPA.

Professional Summary:

- Skilled at Software Development Life Cycle and involved in agile methodology throughout the project. Involved in weekly and daily bases release management.
- Hands on experience in AWS provisioning and good knowledge of **AWS Services** like **EC2, S3, Glacier, ELB, RDS, IAM, Route 53, VPC, Auto scaling, Cloud Watch, Security Groups.**
- Experience with **CI (Continuous Integration)** and **CD (Continuous Deployment)** methodologies using Jenkins and AWS Code Pipelines.
- Worked with **GIT** source code tool and ensured the reliability of the application as well as designed the branching strategies for **GIT**.
- Integrated **Jenkins** CI with **GIT** version control and implemented continuous build based on check-in for various cross functional applications and created **GitHub** Webhooks to setup triggers for commit, push, merge and pull request events.

- Extensively worked on **Jenkins** for continuous integration and for End to End automation for all build and deployments.
- Deployed applications using **Jenkins** server and Troubleshoot build & release job failures, resolve, work with developers on resolution.
- Experience in working on tools like **SonarQube** to check the quality of the code and **Nexus** to save the builds.
- Experience with Configuration Management automation tool Ansible and has worked on integrating **Ansible YAML Scripts**. Used **Ansible** for configuring and managing multi-node configuration management over SSH.
- Created **Docker** images using a **Docker** file, worked on **Docker** container snapshots, removing images and managing **Docker** volumes.
- Involved in deploying the code onto web application servers like **Apache Tomcat**.
- Worked with JIRA for Issue Tracking, monitoring and prioritize issues.
- Worked on Kubernetes installation and application deployment in a container using full automated CI/CD pipeline

Professional Experience:

Company: Grorich Tent systems

Role: DevOps Engineer.

Oct 2020- Till Now

- Extensive experience in strategy and practical implementation of AWS Cloud services which include EC2, EBS, S3, Glacier, Storage Gateway, VPC, Route 53, RDS, ELB, Cloudwatch and also worked in migrating a production infrastructure into an Amazon Web Services utilizing AWS Cloud formation, Ansible, EBS and OpsWorks.
- Creating and Implementing branching and merging strategy with multiple branches and used Git and Bitbucket as source code management repository to keep track of version changes.
- Handle multiple builds from Development team, create build jobs in Jenkins and perform deployment activities.
- Deploying the JAR/ WAR files in Tomcat app server and Verify Deployment logs to check for successful deployments.
- Analyzing application logs in order to determine the possible cause of issues and reporting errors directly to the Dev team.
- Handling complete Build and Release management process including code, document and supporting testing team.
- Worked with Ansible for Orchestration of Deployments for various servers and managed Ansible Playbooks with Ansible modules, implemented CD automation using Ansible, also involved in managing existing Tomcat Webserver and automated the configuration of new servers.
- Configured password less SSH connection between nodes to run the ansible playbooks. Managed the inventory file in Ansible.
- Experienced using different log monitoring tools like Grafana, to see logs information. Monitor & get the health & security notifications from nodes. Created monitors, alarms & notifications for EC2 hosts using Cloudwatch.

Environment: Agile Methodology, Git, Github, AWS (VPC, EC2, S3, RDS, IAM, EBS, Route53, Cloudwatch, Security Groups, Auto Scaling etc.), Grafana, My SQL, Ansible.
