## **Objective**

To secure a position where I can efficiently contribute my skills and abilities to the growth of the organization and build my professional career.

## **Educational Qualification**

- ✓ Bachelor of Technology in Computer Science and Engineering with 6.8 CGPA from Kalasalingam Academy of Research and Education(2016 -2020)
- ✓ Completed Intermediate Education with 92% from Narayana Junior College in 2016.
- ✓ Completed 10<sup>th</sup> standard with 7.7 CGPA from Sri Vivekananda English Medium High School in 2014.

## **Projects**

- Analyzing the Product Requirements through interacting with developers and understanding their Project requirements.
- Design the application, participate in design discussion, and review design artifacts.
- Analysis and identification of new requirements to reduce project development Gaps.

## **Experience:**

### **December - 2019 to December - 2020:**

I served as an Angular developer at Softlogy Technologies, where I gained valuable hands-on experience in Angular along with a variety of associated technologies. During my tenure, I worked extensively with Angular, Firebase, Node.js, MongoDB, Restful APIs, and GIT. This one-year experience allowed me to develop a strong skill set and expertise in these technologies, contributing to my overall proficiency as a developer.

**June - 2021 to February - 2022:**

*I worked as a Project Engineer at Intellect Design Arena, a company operating in the banking domain. During this period, I focused on Angular technology to create banking applications and address the specific software requirements of banks. This role allowed me to contribute to the development of banking software solutions and gain further expertise in Angular.*

**March - 2022 to Present:**

*I have been gaining experience with the MEAN stack (MongoDB, Express.js, Angular, and Node.js) in my current role at Softobiz technologies. My responsibilities include developing and maintaining web applications using these technologies, allowing me to continually enhance my skills and expertise in the MEAN stack.*

**Skills**

- ✓ Programming Languages known C and Python
- ✓ Internet Savvy
- ✓ HTML
- ✓ CSS
- ✓ Bootstrap
- ✓ Angular Material
- ✓ Angular
- ✓ TypeScript
- ✓ Express
- ✓ MongoDB
- ✓ Node Js
- ✓ Restful Api

**Positions of Responsibility**

- 2019-02 Event Organizer at KAREACM  
Student Chapter and CSE department  
Treasurer
