EDUCATION

B.Tech in Computer Science and Engineering (Artificial Intelligence)

November 2021 - Present

Pranveer Singh Institute of Technology, Kanpur

(CGPA of 8.2)

TECHNICAL SKILLS

Languages: Java, Javascript, HTML5, CSS, SQL, Solidity.

Technologies: Linux, ReactJS, NodeJS, Blockchain.

Tools: Version Control, MySQL, Cloud Computing Platforms (GCP), Truffle, Ganache.

Coursework: Data Structures and Algorithms, Database and Management Systems, Operating Systems, Object Oriented System Design, Computer Networks, Compiler Design.

PROJECTS

Hal-Jivi | *ReactJS, NodeJS, Solidity, Polygon* | [↗](#)

Ongoing Major Project

- Engineered an innovative solution to ensure fair Minimum Support Prices (MSP) for farmers by leveraging Polygon blockchain technology.
- Collecting and analysing cultivation cost data for accurately calculating MSP and developing a user-friendly platform for buying and selling crops, eliminating the role of middle-man.
- Enhanced data transparency, security and market access, addressing real-world challenges faced by farmers.

MediVault: The health care project | *Solidity, Ethereum, Truffle, Metamask, Google Cloud Platform, AMD Processor* | [↗](#)

- Developed a decentralized platform for managing electronic health records efficiently, cutting unauthorized data access by 50%.
- Implemented on the Ethereum blockchain, ensuring data integrity, accessibility, and patient-centric control
- Achieved a reduction of processing time by 30% compared to conventional systems
- Facilitated seamless integration with existing healthcare systems.

SignatureForge | *Vanilla JavaScript, HTML, CSS* | [↗](#)

- Developed a user-centric tool for generating and downloading digital signatures, facilitating seamless integration into existing workflows; improved operational efficiency by cutting the signature creation time by over 5 hours per week.
- Added download functionality with multiple formats (PNG, JPG, JPEG), customisable height & width and background options (transparent and white), resulting a rise in user retention by 25%.

Preserve Your Heart | *Python, Machine Learning* | Academic Mini Project

- Engineered a diverse array of machine learning algorithms, including Random Forest, K-Nearest Neighbors (KNN), Recurrent Neural Networks (RNN), and Support Vector Classifier (SVC), achieving a prediction accuracy of over 90%.
- Conducted detailed data preprocessing, fine-tuning, and rigorous evaluation, achieving a sensitivity rate exceeding 85%.
- Demonstrated expertise in machine learning and data science, showcasing the ability to construct reliable predictive models.

ACHIEVEMENTS

Institute level Winner of Solving for India Hackathon by GeeksforGeeks. | [↗](#)

- Launched a pioneering application at the Solving for India Hackathon, achieving recognition as one of the top 200 teams from a pool of 44,000 participants, highlighting exceptional creativity and technical proficiency in project development.

Graph-E-Thon, A 72 hours National level Hackathon by Graphic era University | [↗](#)

- Orchestrated a successful journey to 3rd place in the 72-hour hackathon hosted by Graphic Era University, outshining 80 teams selected after an intense online round. This experience provided invaluable learning and growth.
- Managed the team to work in coordinated shifts during the 72-hour continuous hackathon and advanced from 15th to 3rd place by refining strategies and showcasing relentless drive and adaptability under pressure.

POSITION OF RESPONSIBILITY

Technical Committee | Event Head, Ignitia -College Fest

February, 2023 & April, 2024

- Directed the management and execution of events, ensuring a seamless experience during the two-day college fest.
- Coordinated participation of students from various colleges for events such as Coding Hackathon, Treasure Hunt, Smart City Evolution challenge, and a Blockchain Seminar, engaging over 1,100 students.
- Spearheaded operational and promotional efforts, significantly contributing to the success and overall impact of the fest.
