

CAROLIN JOGY

AI/ML ENGINEER

☎ (+91) 9539394351 | ✉ carolinbesty29@gmail.com | 📍 Kerala, India

PROFESSIONAL SUMMARY

AI/ML Engineer with expertise in designing and deploying machine learning models using TensorFlow, PyTorch, and scikit-learn. Proficient in Python, R, and cloud platforms like Azure, AWS, and Google Cloud. Strong analytical skills, excellent collaboration abilities, and a commitment to ethical AI practices. Passionate about leveraging AI to solve real-world problems, optimize processes, and enhance user experiences through innovative solutions.

SKILLS

- Machine Learning Frameworks
- Natural Language Processing (NLP)
- Computer Vision
- Model Evaluation and Tuning
- Model Deployment and Serving
- Programming Language – Python
- Statistical Analysis and Probability
- Deep Learning
- Text Generation
- Ethical AI and Data Privacy
- Reinforcement Learning
- Communication Excellence
- Problem Solving

WORK EXPERIENCE

Senior Project Engineer, Wipro Technologies

Sept'2020 – Present

- Leveraged frameworks like TensorFlow, PyTorch, and scikit-learn to develop and optimize machine learning models, improving accuracy and efficiency.
- Designed NLP solutions for sentiment analysis, entity recognition, and language translation using NLTK and spaCy. Fine-tuned transformer models like BERT and GPT.
- Developed computer vision applications with OpenCV and deep learning for image classification, object detection, and segmentation.
- Conducted model evaluation using cross-validation and performance metrics. Enhanced models through hyperparameter tuning.
- Deployed models using Docker and Kubernetes. Utilized TensorFlow Serving and Flask for serving and API deployment.
- Maintained Python codebases, adhering to best practices. Automated data processing and training pipelines.

- Applied statistical methods for data interpretation and model validation. Utilized hypothesis testing, regression analysis, and Bayesian inference.
- Trained deep learning models, including CNNs and RNNs, for image recognition and sequence prediction.
- Created text generation models with RNNs and transformers for chatbots and content creation.
- Ensured ethical AI practices and data privacy compliance, including GDPR. Mitigated model biases and protected sensitive data.
- Applied reinforcement learning for optimized decision-making and autonomous system performance.
- Collaborated with cross-functional teams to deliver effective AI solutions. Presented technical concepts to non-technical audiences.
- Identified and resolved technical challenges. Developed innovative solutions to address complex business problems and improve efficiency.

EDUCATION

✓ **MTech in Computing System and Infrastructure**

BITS, Pilani | 2024

Dissertation : Wild Animal Detection In Human Settlement Area Using Deep Learning

✓ **BSc in Mathematics in First Class with Distinction**

University of Calicut | 2020

Project : Code Theory

KEY ACHIEVEMENTS

- | | |
|-------------------------------------|--|
| ▪ 5 Habits Champion – 2024 | ▪ Gladiator - 2023 |
| ▪ Victory League – 2021 – 2024 | ▪ Extraordinaire Awards - 2023 |
| ▪ Inspiring Performance – 2023 - 24 | ▪ Habit Flagbearer - Being Responsive - 2021 |

CERTIFICATES

- | | |
|---|--|
| ▪ Microsoft Certified: Azure AI Engineer Associate - AI-102 | ▪ Microsoft Certified: Azure Administrator Associate - AZ-104 |
| ▪ Microsoft Certified: Azure AI Fundamentals - AI-900 | ▪ Microsoft Certified: Azure Data Scientist Associate - DP-100 |
| ▪ Microsoft Certified: Azure Fundamentals - AZ-900 | ▪ Google GenAI |
| | ▪ GCP – Cloud Digital Leader |
