EDUCATION

Praxis Business School, University of Mysore

Post Graduate Program in Data Science

Relevant Coursework: Applied Analytics in Business, Marketing & Finance

Kolkata, West Bengal

January 2024 - October 2024

CQPI – 6.31/8.00

ACHARYA PRAFULLA CHANDRA COLLEGE(WBSU)

B.Sc. (Hons.) in Computer Science

Kolkata, West Bengal

August 2020 - August 2023

CGPA – 8.19/10.00

Profile Summary

An aspiring Data Scientist seeking to contribute to a forward-thinking organization renowned for its commitment to innovation and professional growth.

- Expert in crafting data-driven solutions, leveraging advanced proficiency in Python, SQL, and Power BI for insightful analysis, visualization, and reporting.
- Hands-on experience in managing the full data science process, from data cleaning and exploration to building and testing predictive models.
- Driven by continuous learning and a commitment to staying ahead of industry trends to deliver meaningful business insights.

PROJECTS

Credit Risk Modelling | [Link](#)

- **Objective:** Elevated risk assessment for credit lending by accurately classifying customers, enabling financial institutions to make informed and targeted lending decisions.
- **Approach:** Conducted Exploratory Data Analysis (EDA), handled missing values, and used techniques like VIF, Chi-Sq, and ANOVA for feature selection. Implemented and optimized XGBoost for the best performance.
- **Outcome:** Achieved enhanced model accuracy and reliability, providing actionable insights that facilitate better decision-making and risk management for financial institutions.

Insurance Price Prediction | [Link](#)

- **Objective:** Developed a machine learning model for the insurance sector to accurately predict charges, streamline pricing strategies, and enhance competitive premiums.
- **Approach:** Performed data cleaning and preprocessing, followed by extensive EDA. Applied Linear Regression, Decision Tree Regressor, Random Forest Regressor, and regularization techniques to improve model performance.
- **Outcome:** Identified Random Forest as the best-performing model, significantly improving prediction accuracy for insurance charges.

IPL Insights Dashboard | [Link](#)

- **Objective:** Developed an interactive Power BI dashboard to analyze comprehensive data from IPL seasons, enhancing data visualization and decision-making efficiency.
- **Approach:** Designed and implemented visualizations for key metrics, analyzed team profiles and player statistics, and provided insights into performance trends.
- **Outcome:** Enabled users to make data-driven decisions by presenting clear and actionable insights through an intuitive dashboard.

Driving Returns: Optimized Auto Sector Portfolio | [Link](#)

- **Objective:** Develop an optimized investment strategy for the auto sector to enhance portfolio returns and reduce risks.
- **Approach:** Analysed historical stock price data of leading auto companies using statistical analysis and optimization techniques. Identified key market trends and constructed an optimal portfolio to maximize returns.
- **Outcome:** Achieved a 12% increase in average returns with a 10% reduction in risk compared to the traditional market index. The optimized portfolio demonstrated superior performance, providing valuable insights for investment strategies in the auto sector.

SKILLS

Languages: SQL, Python

Packages: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-Learn

Tools: Power BI, Tableau, Microsoft Office (Excel, PowerPoint, Word)

Platforms: Jupyter Notebook, Visual Studio Code, Git and GitHub, MySQL, MS SQL Server

Certifications: **BigQuery for Data Analysts** - [Coursera](#), **Associate Data Scientist** – [DataCamp](#), **SQL (Intermediate)** - [HackerRank](#)
