

# Jayesh Vadnere

Data Analyst

[jayeshvadnere8888@gmail.com](mailto:jayeshvadnere8888@gmail.com) | +91 9834856770 | [linkedin-profile](#) | [project-portfolio](#)

## PROFESSIONAL SUMMARY

---

Data Analyst with expertise in data analysis and visualization. Proficient in **Excel**, **SQL**, **Python**, **Statistics** and **Tableau** for data cleaning, analysis, reporting and storytelling. An effective collaborator with strong problem-solving and analytical thinking skills, passionate about leveraging data to drive informed business decisions.

## WORK EXPERIENCE

---

Linux Server Administrator – **Infosys Limited** – Pune

Dec 2021 - Jan 2024

- Leveraged scripting languages like **Bash** and **Python** to automate system tasks.
- Used monitoring tools to ensure system uptime, track server health and proactively address potential issues.
- Troubleshoot and resolved issues related to system configuration.

## PROJECTS

---

### Instagram User Analytics - [link](#)

- Created an **ERD** to better understand the data and queried **MySQL** with **JOINS**, **subqueries**, and **CTEs** to identify bots and fake accounts, providing insights for informed investor decisions.
- Analyzed user data to identify key trends: 13% inactive users, 13% potential bots, and 26% users who never posted a photo, and recommended strategies to re-engage inactive users, filter out potential bots, and encourage content creation.

### IMDB Movie Analysis - [link](#)

- Carried out analysis on the IMDB Movie dataset using **Excel**, focusing on cleaning the data and **statistical analysis** of movie ratings and genres.
- Applied advanced Excel concepts like **lookup functions**, **Pivot Tables** and **Power Query** to derive meaningful insights into trends, correlations and audience preferences, facilitating informed decision-making for film industry stakeholders.

### E-Commerce Order Analysis - [link](#)

- Conducted **data cleaning** and preprocessing using **Python** to resolve duplicates, missing values and inconsistent data types, ensuring data reliability for analysis.
- Performed **exploratory data analysis (EDA)** using Jupyter Notebook to identify top-selling categories, regional trends and inefficiencies like 14.21% cancellation rate and 5.2% unshipped orders, recommending strategies to improve the user experience and reduce cancellations.

### Sales and Customer Analytics Dashboard - [link](#)

- Designed and implemented a Sales and Customer Dashboard using **Tableau** to visualize sales performance, sales and profit trends and key performance indicators (**KPIs**).
- Employed advanced Tableau functionalities to create interactive **dashboards** and **visualizations**, enabling stakeholders to monitor sales, top customers by profit and track sales and profit growth over time.

## EDUCATION

---

**BACHELOR OF ENGINEERING** – Government College of Engineering and Research, Pune

Jul 2017 – Jun 2021

Major: Mechanical Engineering | CGPA: 8.88

## SKILLS

---

- SQL (MySQL)
- Python (NumPy, Pandas, Matplotlib, Seaborn)
- Tableau
- Excel (VLOOKUP, Pivot Tables, Power-Query)

## CERTIFICATIONS

---

- SQL (Advanced) Certification by HackerRank - [link](#)
- Python (Basic) Certification by HackerRank - [link](#)
