Pursuing opportunities as a data professional dedicated to engineering and analytics, committed to delivering impactful business insights and operational improvements.

Location Preference: India

PROFILE SUMMARY

Data Warehousing

Cloud Infrastructure Management

Data Quality Assurance

Business Intelligence Solutions

Data Pipeline Optimization

Healthcare Data Management

Statistical Analysis Methods

Predictive Analytics Applications

Data Governance

Data Integration

- **Nearly 3 years of experience in IT**, specializing in data engineering, analytics, cloud computing, and data management.
- Data Engineer at Accordion, designing and implementing data pipelines and reporting systems.
- Expert in cloud infrastructure, data warehousing, and advanced analytics, driving data-driven decision-making.
- Proficient in Azure Data Factory, Power BI, and SQL, with a focus on data ingestion, transformation, and visualization.
- Led healthcare data warehousing project, delivering financial insights through Power BI dashboards.
- Improved query execution time by 60%, enhancing system performance and user satisfaction.
- Analyzed a real-time Airline Database case study, solving complex queries using Joins, Case statements, and Window functions with 95% accuracy.

WORK EXPERIENCE

Sept 2024 – Present, Product Verified (Bhopal, Madhya Pradesh) – Present: Founder

Role:

- Spearheaded the launch and growth of a customer-centric e-commerce platform, driving scalability through strategic digital marketing, partnerships, and customer engagement initiatives.
- Utilized advanced analytics tools (e.g., Google Analytics, Facebook Insights) to monitor key performance indicators (KPIs), optimizing campaigns and reducing cost-per-acquisition by 30%.

Jan'2023 to Sep'2024: Data Engineer at Accordion, previously known as Merilytics, Hyderabad

Role:

- Led financial data ingestion for a healthcare client using Alteryx, ensuring incremental and full load processing with strong data quality checks.
- Architected Azure-based data warehousing solution, streamlining data flow through landing, raw, and clean zones for improved stakeholder accessibility.
- Automated data movement with stored procedures, improving operational efficiency and data management practices.
- Deployed automatic exception control reports using Azure Logic Apps, ensuring prompt resolution of data discrepancies.
- Implemented CI/CD data migration with Azure DevOps and SQL Server Management Studio, reducing deployment time and enhancing feature roll-out speed.
- Optimized stored procedures, achieving a 60% reduction in query execution time and boosting system performance.

Mar'2022 to Nov'2022: Junior Cloud and Infrastructure Engineer at LTIMindtree, Pune

Role:

- Managed Azure PaaS applications, ensuring optimal performance, availability, and reliability across multiple projects.
- Developed data ingestion pipelines using Azure Data Factory, integrating data from APIs, SFTP, and Blob Storage to support analytics.
- Collaborated on CI/CD pipeline optimization with DevOps, ensuring seamless deployment and application performance.
- Implemented security measures and compliance protocols, safeguarding data and ensuring regulatory standards were met.

ACHIEVEMENTS

- Successfully led a data warehousing project for a healthcare client, resulting in the timely delivery of critical financial insights and enhancing decision-making capabilities.
- Implemented data quality assurance measures that improved data accuracy and reliability, leading to increased client satisfaction and trust in data-driven insights.
- Achieved a significant reduction in data processing times, contributing to overall operational efficiency and enabling the team to focus on strategic initiatives.
- Developed and executed multiple stored procedures that automated data movement across various zones, improving operational efficiency and data management practices.

ACADEMIC DETAILS

- Bachelors in Technology, Major in Civil Engineering with Minor in Automotive Technology | Statistics, MIT, Manipal, Karnataka, 2021

IT SKILLS

- Python, Advanced SQL, Microsoft Azure for Cloud Solutions, Azure Data Factory for data integration and ETL Processes
- Power BI, Tableau, Git, Microsoft Office Suite, Jupyter, Cloud Computing

CERTIFICATIONS

- HIPAA Certified Analyst
- Certification in Tableau
- SQL, Statistics & Excel Boot Camp Course – Skillovilla

PROJECTS

SkilloVilla (July 2021- Nov 2021) [Link](#)

- **Data Analytics (MS Excel and SQL):** Advanced SQL and MS Excel to solve real-time case studies using functions and formulas with 100% accurate results.
- **Visualized real-time Food Ecommerce** Company data and created a dashboard by creating logical metrics using pivot tables, charts, & diagrams with 95% accuracy.
- **Airline Database Case Study:** Designed and developed the airplane distribution system in the Gates; solved and developed queries using joins, case statements, and window functions with 95% accuracy.

PERSONAL DETAILS

Date of Birth: 25th January 1998
Languages Known: English, Hindi
Address: Hyderabad, 562026
