

KRISHNA SEKHAR

RPA DEVELOPER

krishnasekhar.di@gmail.com

+91 8848736625

EDUCATION

MSc Computer Science –
Kerala University, 2017

TECHNICAL SKILLS

- **RPA Tools:**
UiPath, Automation
Anywhere (A360 & V11),
Robocorp
- **Programming:**
Python
- **ERP Systems:**
Microsoft Dynamics,
ODOO, Oracle ERP
- **Project Management:**
Jira

CERTIFICATION

AUTOMATION ANYWHERE

- ◆ Certified Advanced RPA
Professional (A2019 &
V11)
- ◆ Certified Master RPA
Professional (V11)

PROFESSIONAL SUMMARY

Experienced RPA Developer with 4+ years of automating business processes across diverse industries, specializing in financial automation and bank reconciliation. Expertise in UiPath, Automation Anywhere, and Robocorp, with a proven ability to design scalable solutions, create thorough documentation, and support seamless deployments. Adept at improving financial workflows and operational efficiency through innovative automation technologies.

WORK EXPERIENCE

AUTOMATION ENGINEER – QUADANCE TECHNOLOGIES

August 2021 to Present

- Designed and deployed RPA bots and development tools using UiPath, Robocorp, and Open RPA.
- Provided post-deployment support and troubleshooting for RPA solutions.
- Collaborated with development teams to integrate automation with existing systems.
- Created Solution Design Documents (SDD) and Process Design Documents (PDD) for various projects.
- **Key Projects:**
 - **Procore Archiving Automation Project (UiPath):**
Developed an automation solution for Procore Archiving, providing users with an efficient platform to automate the archiving process of project files from Procore to ProjectWise. The solution streamlined data extraction, file downloads, and uploads, ensuring seamless archiving with minimal manual intervention.
- **High-Level Steps:**
 - ✓ **Data Upload:** Fetched closed project details from

UIPATH

- ◆ Developer Foundation
- ◆ Advanced Developer
- ◆ Document Understanding
- ◆ AI Center

Oracle and cross-referenced them with Power BI reports to identify the relevant project instance. Project IDs were queued for processing.

- ✓ **Download Project Files:** Automated downloading of all related project files to a local folder, then added the project to the next processing queue.
- ✓ **Upload to ProjectWise:** Uploaded files to ProjectWise and managed error handling for failed files, with notifications sent to the Planner. Archived completed projects by inactivating them in Procore.

- **Systems and Technologies:**

UiPath, ProjectWise, Procore Web Application, Power BI, Planner, Oracle, MS Excel.

- **Key Benefits:**

- ✓ **Drastically** reduced manual intervention in project file archiving.
- ✓ **Improved** operational efficiency by automating complex file transfers between systems.
- ✓ **Provided** actionable insights and exception handling via automated reporting and error notifications.

- **HR Onboarding Process (UiPath):** Automated HR onboarding, user account creation, and data updates across multiple systems.
- **Active Directory Batch Bot (UiPath):** Automated user account maintenance and reporting for business users, from requirement gathering to deployment.
- **Cost Validation Process Automation:** Streamlined reconciliation and validation for a restaurant franchise network, improving invoice accuracy and system updates in platforms like CML and NDCP.

RPA DEVELOPER – ALZONE SOFTWARE PRIVATE LIMITED

October 2019 to July 2021

- Developed and deployed RPA components for diverse business processes using UiPath and Automation Anywhere.
- Created comprehensive process documentation to ensure clarity in implementation and future updates.
- Collaborated with cross-functional teams for solution development and production issue resolution.
- **Key Projects:**
 - ✓ **Bank Reconciliation and Collection Report (Microsoft Dynamics):** Automated bank reconciliation, improving data integrity and financial process efficiency for clients. This reconciliation automation was done to support the Vendor Management team of the client company.
 - ✓ **Multi-format Data Extraction & Proforma Generation:** Integrated invoice data extraction into ODOO and Oracle ERP, processing over 300 invoice formats for 700+ customers.
