PROFESSIONAL SUMMARY

Experienced Data Scientist with 12 years in IT, including 8 years in Data Science. Proven problem solver with a diverse background spanning Avionics, Online Search Advertisement and Higher Education Industries. Have worked with Stakeholders and Customers from US, UK, APAC and Domestic. Adept at tackling complex challenges across domains, leveraging data-driven insights to deliver innovative solutions using Machine Learning.

SKILLS

Programming	Python, SQL, R
Cloud	AWS, Azure
Machine Learning	Supervised ML, Unsupervised ML, NLP, Timeseries Analysis, Fine Tuning, Neural Networks
Tools	Tableau, VS Code, Git, Docker
UI	Flask, Gradio

PROFESSIONAL EXPERIENCE

Data Scientist

Quacquarelli Symonds (QS) | March 2021 - Present

- Sales Application:

Spearheaded the full lifecycle of machine learning model development and deployment for the sales team, aligning project objectives through POC sessions with key stakeholders. Architected and implemented a Multi-Layer Perceptron model leveraging AWS EC2 for scalable deployment, Gradio for user interface integration, and Snowflake for data management, driving a \$75K boost in sales performance.

- Student Success Events:

Designed and deployed a predictive machine learning solution to forecast student turnout at events, empowering the student success team to engage proactively with attendees. Collaborated with cross-regional teams to implement the solution using the Gradient Boosting Algorithm, resulting in a 10K increase in event participation and unlocking cross-selling opportunities with financial institutions, generating additional revenue for business teams.

- Topic Modelling for QS Reimagine Education Awards:

Developed an automated solution using Latent Dirichlet Allocation (LDA) to streamline topic understanding and classification for the QS Reimagine Education Awards, a global platform recognizing educational innovation. The solution replaced manual content review, increasing efficiency. In 2024, expanded the awards' scope by introducing new topics, enhancing the relevance and diversity of submissions.

- Object Detection Using University Images:

Spearheaded an image tagging solution for university-supplied images to identify and categorize campus facilities. Leveraged APIs from Azure, AWS, and Inferdo, customizing outputs through a majority voting approach to enhance image recognition accuracy.

Module Lead (Data Science)

Mindtree (Now LTIMindtree) | January 2019 – March 2021

- Customer Persona Modelling:

Developed customer persona models for Bing platform advertisers to address SMB customer churn using K-Means and Random Forest algorithms. The solution enabled the Bing team to provide better optimization techniques, improving advertiser retention and performance.

- Ads Analysis:

Worked on automation using Azure Data Lake Analytics and U-SQL to extract and analyze listing data, identifying high-value listings that generate revenue for the Bing platform. The solution was refreshed weekly to support downstream projects at customer sites.

- Opportunity and Gap Analysis:

Designed forecasting models for different customer segments, enabling clients to identify and capitalize on new business opportunities using ARIMA time series.

Sr. Engineer (Data Science)

Honeywell | January 2012 – January 2019

- Developed Tableau dashboards for the Aerospace Data Services team, achieving \$50,000 in cost savings.
- Built data-driven analytics for flight events using R and R Shiny, for better showcasing the need of the Honeywell avionics products for the Airlines.
- Developed Machine Learning Solution for HBT terminal project using Logistic Regression.

Intern

Honeywell | September 2010 – July 2011

EDUCATION

Post Graduate Diploma in Data Science	IIITB-UpGrad	August 2016
M.Tech in Software Engineering	RVCE Bengaluru	October 2011
B.E in Computer Science	SDMCET Dharwad	July 2008

ACCOMPLISHMENTS

- **Achiever Award** at QS for ideation and project execution (2022, 2023)
- **Star Performer Award** at Mindtree for overall contribution (2019, 2020)
- **Individual Excellence Award** at Honeywell for various projects (2014-2018)
- Filed **WIDS (Worldwide Information Disclosure)** at Honeywell (2015-2018)
- **National Level Award** at Techno Champ, John Deere (2010, 2011)
