

NIYAM DAYAL

Email: niyamd@gmail.com | Phone: +91 7219608177

Professional Summary

Dynamic and highly skilled Software Developer with expertise in front-end technologies, including React JS, TypeScript, and Next.js. Proficient in crafting responsive, secure, and high-performance web applications. Experienced in leading development teams and mentoring junior engineers, ensuring adherence to coding standards and delivering quality projects. Passionate about learning and implementing new technologies to drive innovation and deliver impactful solutions.

Technical Skills

- **Frontend Technologies:** React JS, Angular JS, Next.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Tailwind, LESS, SASS
 - **Backend Technologies:** Node.js, GoLang, ASP.NET, VB.NET
 - **Database:** SQL Server
 - **Web Technologies:** REST, GraphQL, HTTP, APIs, asynchronous request handling, advanced web performance optimization
 - **Tools & Frameworks:** Redux, TypeScript, Service Workers, Grunt, JQuery
 - **Testing & Quality Assurance:** Automated testing, code reviews, accessibility compliance, internationalization best practices
 - **Other Expertise:** Web application security, performance monitoring and tuning
-

Professional Experience

Tech Lead, Lumeneo(Early Stage Startup)

August 2024 – October 2024

- Spearheaded front-end development for key projects, focusing on responsive, high-performance applications using **Next.js** and **TypeScript**.
- Designed and integrated back-end APIs using Node.js, ensuring seamless front-end and back-end communication.
- Enhanced collaboration between teams by establishing streamlined processes and coordinating with UX/UI teams for optimized user experiences.
- Introduced testing methodologies that improved code efficiency and reduced production bugs.

- Implemented advanced security measures to mitigate web vulnerabilities and ensured adherence to security standards.
-

Tech Lead, BotGauge(Early Stage Startup)

November 2023 – June 2024

- Led a team of 8 front-end developers, architecting a scalable front-end framework with **React**, **Next.js**, and **TypeScript**, improving application performance by 30%.
 - Developed robust back-end services using Node.js, enabling faster data handling and integration across the application stack.
 - Established automated testing protocols, reducing bugs in production by 25%.
 - Acted as a key liaison among product managers, designers, and developers to ensure high-quality, feature-rich project deliverables.
 - Focused on web performance optimization, leveraging monitoring and tuning tools to ensure fast and efficient user experiences.
-

Front End Developer,Saucelabs

March 2021 – October 2023

- Developed user-facing features with **React** , delivering high-quality code adhering to modern UI principles.
 - Built reusable front-end libraries and components, optimizing scalability for future projects.
 - Ensured compliance with SEO principles, accessibility standards, and internationalization best practices.
 - Collaborated closely with design and development teams to meet project requirements and maintain code quality.
-

Front End Developer,Autonomiq(StartUp)

March 2020 – March 2021

- Led the development of modern, user-friendly interfaces using **React**, ensuring smooth and responsive user experiences.
- Built highly reusable and scalable front-end components to standardize and accelerate development across multiple projects.
- Optimized performance for complex web applications, focusing on reducing load times and improving client-side rendering.
- Collaborated with back-end teams to integrate RESTful APIs and GraphQL, ensuring seamless data flow and dynamic content delivery.
- Designed and implemented comprehensive testing frameworks.

Front End Developer, Tech Mahindra

October 2016 – February 2020

Projects:

1. **Econvergence** - Reporting tool for British Telecom
 - Technologies: React JS, Node JS, Java, JavaScript
 - Developed responsive user interfaces and reusable components for future projects.
 2. **myATT** - AT&T Mobile Application
 - Technologies: Angular JS, JQuery, Node.js, HTML5, CSS3
 - Designed and developed user-facing features for AT&T's mobile billing and usage application.
-

Software Engineer, Cognizant Technology Solutions

September 2012 – September 2016

Project:

- **ELC Online** - E-commerce site for Asia-Pacific regions
 - Technologies: Perl, JavaScript, SQL, HTML, JQuery, CSS
 - Resolved critical production issues, earning awards for innovation and problem-solving.
-

Accomplishments

- **ELC Online “Star Performer”** for resolving critical blocker issues in E-commerce operations.
 - **E-com Prodigy (2015)** for exceptional contribution to E-commerce development.
 - **Path Finder Award** for demonstrating outstanding problem-solving skills.
-

Education

- **Bachelor of Engineering (B.E.)** - Birla Institute of Technology, Mesra
CGPA: 7.5/10
 - **12th Grade** - Kendriya Vidyalaya, Saharanpur, 76.6%
 - **10th Grade** - Kendriya Vidyalaya, Saharanpur, 86.6%
-

Additional Information

- **Location:** Pune, India
- **Date of Birth:** 17th July 1991
