

Skills

- **Programming Languages:** C++, Core Java, JavaScript, HTML, CSS
- **Frameworks/Libraries** : React.js, Node.js, Express.js, Axios, Tailwind CSS
- **Databases** : MongoDB, MySQL
- **Tools/Platforms** : Git, GitHub, AWS Services, Vs Code

Work Experiences

Junior MERN full stack developer	Vulnshields Consulting Pvt. Ltd. Bengaluru, India React.js, Node.js, Express.js, MongoDB	February 2024 - Present
• Front-End Development: As a Junior MERN Full Stack Developer at Vulnshields, contributed to the front-end development of the company website using React.js, designing and implementing user interfaces and creating dynamic pages to enhance user engagement. • Responsiveness and Integration: Ensured responsiveness of web applications and integrated with backend services for a seamless user experience. • AWS Deployment and Management: Deployed and managed projects on AWS, utilizing services such as EC2, and S3 to ensure scalability and reliability. • Scan Tool Development: Developed a comprehensive scan tool using React.js, Node.js, Express.js, and MongoDB to enhance website security and user experience. The tool efficiently identifies vulnerabilities and broken links, ensuring compliance with industry standards. Collaborated with cross-functional teams for seamless integration and conducted rigorous testing, while providing documentation and training to improve website performance and user satisfaction.		
MERN Full Stack - Training	Ethnus CodeMithra Bengaluru, India React.js, Node.js, Express.js, MongoDB	August 2023 - February 2024
• Acquired MERN stack expertise, seamlessly navigating between frontend (React) and backend (Node.js, Express) technologies. Designed, implemented, and maintained robust web applications during dynamic training at Ethnus Codemithra. Contributed to innovative solutions, collaborating closely with a talented team in a hands-on, collaborative environment.		

Projects

Personal Expense Tracker React Express Node Mongo DB	Link
• The project is a personal expense tracker application that allows users to register, log in, manage their expenses, and view their expense history. It includes authentication, CRUD operations for expenses, and a simple UI for interaction. It also Performs application maintenance, enhancement, and development.	
E-Commerce Website React Express Node Mongo DB	Link
• Developed a dynamic Learning E-commerce website named "Shop" using the MERN Full Stack, proficiently implementing key functionalities such as Home, Login, Signup, and Add to Cart features. Demonstrating expertise in creating a seamless user experience through responsive design and efficient back-end operations, I analyzed, coded, and tested application components to ensure robust performance and user satisfaction.
