OBJECTIVE

To pursue a key role within an organization that challenges me to grow and excel, while leveraging my skills and expertise. I aim to thrive in a forward-thinking, technology-driven environment where I can contribute meaningfully and advance in a dynamic, competitive setting.

EXPERIENCE

• Wipro

March 2023 - Present

Embedded C++ Developer

Chennai, India

Project: Nokia 1830 PSS

Brief description: The Nokia 1830 PSS project involved designing and implementing solutions for a high-capacity photonic switching system. The project focused on optimizing performance and reliability for telecommunications networks.

Primary Responsibilities: Primary Responsibilities:

- * **Requirement Analysis and Discussion:** Analyzed and understood requirements, engaged in meetings with clients to resolve queries, and finalized requirements.
- * **Business Requirements Understanding:** Gained insights into the business needs of the CIA system and translated these into system specifications.
- * **Designing Coding:** Designed and developed various modules extensively using C++ and the Standard Template Library (STL). Created and utilized a **CLI (Command-Line Interface)** for efficient interaction and control. Performed unit testing to ensure code quality.
- * **Debugging and Code Walkthroughs:** Identified and fixed bugs in C++ code through thorough debugging and code reviews. Utilized tools such as PuTTY for remote debugging.
- * **Version Control and Code Review:** Managed code versioning and code reviews using **Git** and **Gerrit** to ensure code quality and maintainability.
- * **Client Review Meetings:** Attended meetings with clients to evaluate project load and execution timelines.
- * **Progress Reporting:** Provided regular task progress reports to senior management.
- * **Training and Knowledge Sharing:** Identified team training needs and conducted sessions to enhance team knowledge.
- * **Testing:** Participated in the creation and review of functional and unit test cases.
- * **Delivery:** Prepared release notes and managed weekly delivery schedules.
- * **Deployment Support:** Collaborated with the deployment team to ensure successful system deployment.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, C++11, SQL, Unix Shell Script
- **Development Environments/IDEs:** Vi, Eclipse, PuTTY
- **Tools:** GCC, Makefile, Source Insight, JIRA, Gerrit, Confluence, Vnc
- **Operating Systems:** Linux
- **Databases:** Oracle 10g, 11g
- **Database Connection:** OCCI
- **Version Control Systems:** SVN, Git
- **Static Code Analysis:** Co-verity, Vera-code
- **Debugging Tools:** GDB, Valgrind
- **Ticketing Tools:** JIRA, ServiceNow
- **Libraries and Frameworks:** STL (Standard Template Library)
- **Skills:** Data Structures, Algorithms

EDUCATION

- **Bhagalpur College of Engineering**
BTECH(C.S.E)
* GPA: 8.28/10.00

August 2018 - August 2022
Bihar, India
