PROJECTS

Ubicentrex Solution (04/2024 - Present)

- This solution generally works on VOIP i.e. Voice Over Internet Protocol and Data solutions It provides service especially to call centers, Telecallers in India but in France it targets especially to Doctors along with Telecallers firms.
- Working on new enhancements like Voice Blast, Message delivery through whatsapp, sms.
- Working on integrations /modifications into the solution as per client requirement.
- PHP Native framework was used as backend along with Mysql database. Bootstrap framework was used for front end part integration.

Production Control (02/2015 - 04/2024)

- Migrated the existing desktop application to web application in LAMP stack which was running in Lotus Notes i.e. one of IBM Product.
- Yii PHP framework was used as backend along with Mysql database. Bootstrap framework was used for front end part integration. Application was developed in Responsive design layout.
- REST APIs were consumed parallel for information display. SSO login was also implemented through the help of SimpleSAML PHP library.
- Deployed application to Internal Cloud and self managing there itself. Platform is Linux.
- Now in second phase I was migrating some of the modules in MERN stack from LAMP stack. Material UI is now being used for front end part integration along with existing built phase.
- Following Agile methodologies using Scrum, Kanban board along with implemented all phases of SDLC. Code review, quality checking all is being passed through Veracode third party tool.

- Experience on developing which also includes web services like REST, RESTFUL API'S. Experience in Web Application debugging skills using Chrome Developers Tool and Firebug.
- Familiar with NoSQL Database Design, Analysis and Development like MongoDB.
- Involved in writing application level code to interact with APIs, REST full Web Services using AJAX, JSON, Linux environment.
- Experience in build tools like Jenkins etc. Used service versioning tools like Tortoise SVN, Tortoise Git, Gitlab, Github.
- Experience in organization internal Cloud deployment/migration under platform linux and windows.

Technical Skills:

Web Technologies: HTML5, CSS3, AJAX, jQuery 2.0.2, Bootstrap, Material UI CSS library

JavaScript Libraries: React JS 18.0

Frameworks: CodeIgniter , Yii 2, Express JS, PHP Native

IDE & Tools: Notepad++, Netbeans, Microsoft Visual Studio 1.79 , PHPStorm

Other Tools: Autosys, JIRA, Firebug, Chrome Developers Tool, JENKINS

Methodologies: Agile, Waterfall

Database: Mysql 5.7,Mongodb

Operating Systems: Windows 7, UNIX, RHEL 7 and 8(Linux)

Version Controls: SVN, GIT, Gitlab, Github

Programming: PHP8.2, OOP, React JS 18.0

Application Server: Apache 2.2 Web Application Server

Concepts: Object Oriented Design, Model View Controller, Content Management System, Continuous Integration/Deployment using Jenkins, Gitlab,Github

Payment Gateway: Paypal, Authorize.Net, Federal Bank

Cloud Technologies: SS&C Internal Cloud
