Summary

- **14 years of IT experience**, including **+5 years as a Product Manager/Owner** and **3 years as a Business Analyst**, driving product success.
- **SAFe Agile certified PO/PM and Agile Practitioner**, ensuring efficient and agile project execution.
- **Translated client business requirements into precise user stories**, expertly managing and prioritizing product backlogs.
- **Executed comprehensive testing strategies** (functional, regression, UAT, integration) to validate product quality.
- **Spearheaded feature development for AirAsia Move**, including Bundles, Fast Pass, and insurance, significantly **increasing ancillary revenue through upselling**.
- Contributed to the implementation of critical systems for **Amadeus** (BRS, active standby) and managed **AWS cloud migration projects**.
- Utilizes **Jira, Confluence**, and proficient in **AI tools** like Gemini, Grok, Gamma, Napkin, and ChatGPT for enhanced efficiency and insights.
- Experience and certified in Generative AI and prompt Engineering.

Achievements

- **Generated a 26% increase in ancillary revenue for AirAsia Move in 2024** by leading the creation and integration of critical features such as Bundles (Value pack, Premium Flex, Premium Flatbed), Fast Pass, and E-Invoice.
- **Achieved a 55% surge in Tune Insurance sales** through strategic in-path integration.
- **Received the "Revenue Generator" award in 2024 at AirAsia**, recognizing direct contributions to financial growth.
- **Spearheaded the development of a UFT-based Hybrid framework for desktop UI automation, completing it in 4 weeks** and securing its adoption across Amadeus (2019).
- Consistently recognized for **"Exceeding Target" performance at Amadeus from 2016 to 2018**.
- Named **"Outstanding Performer of the Year" at Mindtree Ltd. (2011-2012)**.

WORK EXPERIENCE (14 years – B2B and B2C)

1. Senior Product Manager | AirAsia Move (Nov 2021 – Present)

- **Key Responsibilities:**
 - Led product management for **Flights and Ancillary teams** within a leading OTA platform (AirAsia Move App - web & mobile), driving end-to-end product lifecycle.
 - Orchestrated **requirement gathering** from diverse clients (e.g., BC Kiwi, Goquo, Navitaire, Travelport, FR24) and internal stakeholders, ensuring comprehensive understanding of business needs.
 - Developed and **maintained product roadmaps and backlogs**, prioritizing features to align with strategic company goals.
 - Collaborated cross-functionally with Customer Happiness, Ground Operations, and Marketing teams to **resolve customer issues** and enhance product offerings.
 - Provided **innovative solutions for client and internal requirements**, leading to successful feature enhancements.
 - Monitored **dashboard analytics for sales performance and error analysis**, providing data-driven insights.
- **Key Achievements/Projects:**
 - Successfully created and integrated high-impact features including Bundles (Value pack, Premium Flex, Flatbed), Fast Pass, and Insurance for AirAsia Move, enhancing customer offerings and revenue.
 - Managed a comprehensive OTA platform offering flights, ancillaries (Food, Fast Pass, Wheelchairs, Insurance, Bundles), online check-in, hotels, and ride/food ordering.
- **Tools/Software:**
 - AirAsia Web App, AirAsia Android/iOS Mobile App (React Native), Jira, Confluence

2. Sr. Business Analyst | Amadeus Labs Pvt Ltd (Jan 2019 – Oct 2021)

- **Key Responsibilities:**
 - Gathered detailed requirements and **authored comprehensive specifications (Specs) and Customer Requirement Documents (CRD)** based on Statements of Requirements (SOR).
 - **Designed high-level solutions** and verified developed features against initial requirements to ensure quality and completeness.
 - Managed **backlog creation and prioritization**, ensuring alignment with client (Amman, Qatar) and project objectives.
 - **Planned and coordinated client drops**, facilitating successful product releases.
 - Conducted **client demonstrations** and created essential **release documentation**.
- **Key Achievements/Projects:**
 - Played a critical role in the development of the **Baggage Reconciliation System (BRS)**, a new product enabling real-time bag tracking to reduce mishandling and enhance flight security.
- **Tools/Software:**
 - BRS Web App, BRS Android (Android 9 & 10), Scanner, Jira, PowerPoint.

3. Member Technical Staff | Amadeus Labs Pvt Ltd (Feb 2015 – Dec 2018)

- **Key Responsibilities:**
 - Analyzed and **understood client business requirements** for All Nippon Airways (NH).
 - **Identified and assessed various testing dimensions**, including interfaces, integrations, SI dependencies, functional flows, non-functional requirements, and switch validation/data integrity.
 - **Led a QA team of 5 members**, overseeing testing efforts and ensuring timely, high-quality module delivery.
 - Ensured all assigned tasks were completed and delivered on schedule
- **Key Achievements/Projects:**
 - Contributed to the **DCS Active Standby** project, implementing a secondary standby system for business continuity and flight departures with minimal service degradation.
 - Supported the **Amadeus Altea DCS Customer Management** program, focusing on quick identification, bag addition, acceptance, and boarding processes to automate airline airport management operations.
- **Tools/Software:** Java, Admin, Inventory, UFT, SQL Developer.

4. Test Specialist Engineer | Mindtree Pvt Ltd (Jun 2011 – Jan 2015)

- **Key Responsibilities:**
 - Participated in **daily status calls with Scrum Masters**, ensuring transparent communication and progress updates.
 - **Designed and reviewed test cases**, ensuring comprehensive test coverage.
 - **Documented application requirements** and performed **test execution and defect reporting**.
 - Involved in **functionality and UI Integration testing**.
 - **Effectively reported bugs using Jira**, and diligently followed up with developers on defect resolution.
- **Key Achievements/Projects:**
 - Contributed to the **SITA GSL (Government Security Lines) project**, an Agile product enhancing government agencies' ability to monitor pre-departure travelers for border security and smooth transit.
- **Tools/Software:** Java, Quick Test Professional (QTP), DB Visualizer, SOAPUI Pro.
