Education

L D College of Engineering

BE in Computer Engineering, Secured an aggregate of 8.18 CGPA

Ahmedabad, India

2019 – 2023

Jawahar Navodaya Vidyalaya

Central Board of Secondary Education

Daman, India

2017 – 2019

Experience

Knackroot Technolabs

Jan 2023 - current

Software Development Engineer

Ahmedabad, India

- Working on project with designing, coding, testing, and deploying smart contracts on blockchain platforms such as Ethereum and Polygon using solidity smart contract and NodeJS and MongoDB for backend.
- Designing and developing subgraphs to extract and index data from various blockchain networks.
- Deployment scripts using Hardhat, Ether.js, Web3.js and JavaScript

Silverwing Technologies

Dec 19 - April 2020

Web Development Intern

Ahmedabad, India

- During this tenure, I had worked on web designing technologies like HTML, CSS, Java Script & Bootstrap Framework. Overall, my goal as a frontend developer was to create visually appealing, intuitive, and high-performing interfaces that enhance the overall user experience

Achievements

- ICPC [Regionalist 2020](#) and 2022
- 2000+ rating at [Leetcode](#).
- Specialist at [Codeforces](#) Highest rating - **1489**.
- Google Hashcode **AIR- 949**
- 5 star at [Codechef](#)

Skills

CPP, Java, Data Structures, Algorithms, Problem Solving.
The Graph Protocol to extract and index data.
JavaScript and Nodejs for backend development.
Blockchain Smart contract Development with Solidity.
Database: MongoDB.

Project

DecentraWeb

[Deployed Link](#)

- I deployed a decentralized DNS (Domain Name System) with over **400k NFT** minted on Ethereum/Polygon with over **34k** unique users, using Solidity, The Graph, NodeJS, and MongoDB. User can also sell their domain as NFT on opensea market place.
- Used the graph protocol for data storing via indexing, solidity for smart contract development and NodeJS with MongoDB for backend development.

Evolution

- I designed and deployed a smart contract system featuring the Evolution Token and an NFT showcase for tracking user levels. Progression involves acquiring referrals and achieving **Orb World ID** milestones, with rewards based on user levels and one of the first project to launch on **worldChain**
- Additionally, I developed a data storage solution using The Graph protocol for efficient data querying and integrated World ID to enhance user identity verification and security.

Web 3.0 Ethereum payment

[Deployed Link](#) / [Github Link](#)

- Built a Blockchain web 3.0 website using solidity smart contract and used MetaMask as a wallet. The job was to send cryptocurrency to anyone across world by using wallet address and can be verified on etherscan. Also integrated Giphy API to add a gif with the last transactions details.
