

SANOBAR ZULFEQUAR

AI/ML Computational Science Analyst- SDE

Project Details:

- ✓ **End-to-End Project Involvement:** Actively contributed in the complete project lifecycle for Python automation and Gen AI initiatives, including requirement gathering, technical design, backend development and deployment, API development and handling endpoints, UAT bug fixing and production stabilization.
- ✓ **AWS Solution Engineering:** Engineered scalable backend solutions using AWS services to optimize data processing and storage and enable seamless API integration for external system, leveraging Docker containers for microservices and CloudFormation templates for streamlined deployments
- ✓ **Cross-Functional Collaboration:** Collaborated with cross-functional teams to integrate backend solutions, develop APIs for system interoperability, and aligning system design and workflow with business objectives.
- ✓ **Microservices and APIs Development:** Developed and enhanced Lambda-based microservices, and built/handled API(s), ensuring robust functionality and responsiveness to business needs.
- ✓ **Deployment & Testing Excellence:** Managed end-to-end deployment of developed requirements, conducting unit testing for API endpoints and backend workflows to ensure quality and stability, utilizing ZIP based and DOCKER based deployments wherever necessary.
- ✓ **Efficient Troubleshooting & Problem Solving:** Addressed and resolved production issues across multiple environments and platforms, ensuring seamless operations and quick recovery.
- ✓ **Code review and Leadership:** Experienced in ensuring best practices and quality standards. Led and mentored immediate juniors, providing technical guidance and support.

Projects Specifics:

-**Intelligent Process Automation Solution:** Worked on use cases that involved automating workflows with significant manual workloads using Python and AI/ML intelligent automation, resulting in a notable reduction in manual effort while enhancing data accuracy and processing speed. Designed RESTful APIs to expose key automation functionalities for integration with other enterprise systems. Utilized Docker to containerize the automation process for consistency and ease of deployment.

- **Gen AI Solution:** Conceptualized, built, and deployed Gen AI products and automations hosted on Azure, integrated with AWS backend services, to analyse and generate insights data. Building AI/ML solutions with a focus on crafting advanced AI and Generative AI systems, designing scalable Python-based architectures, and developing robust system designs. Specializing in Python backend development and delivering end-to-end, production-ready applications that seamlessly integrate cutting-edge AI technologies into real-world, high-performance systems. Engaged in research and development (R&D) to drive innovative AI solutions.

Project Highlights:

- ✓ Global Pharmaceutical Company
- ✓ AI/ML Engineering, Backend Python Developer
- ✓ **Tech stack:** Requirement Analysis, GEN-AI POCs, Python, AWS, Microservices, LINUX, SQL, RESTful API(s), System Design, System Integrations, architecture flow, Unimodal AI, Multimodal AI, RAG(s), Agentic AI, LLM(s), Prompt Engineering, SaaS, Web solutions, Zip/Docker deployments, CI/CD Pipeline.

SKILLSET

Technical Skills

- ✓ **Languages:** Python, SQL, Linux, HTML, CSS
- ✓ **Frameworks:** Flask, FAST API, Langchain, OpenAI
- ✓ **Databases:** SQL, T-SQL
- ✓ **Cloud & Services:** AWS (CFT, S3, RDS, EC2, Lambda, Event Bridge, SSM, ECR, API GATEWAY, Sagemaker, CloudWatch, AWS CodePipeline, SNS, SQS, DLQ, Step Function), Azure (for Gen AI model hosting), Multiverse and DEVOPS account.
- ✓ **Tools:** Putty, Filezilla, Visual Studio, Microsoft SQL Server Connect, SVN, Git, DocIT, ALM

Interpersonal Skills

- ✓ Good Communication skills | Team Collaboration | Problem Solving | Adaptive Thinking | Conflict Resolution | Open to Constructive Feedback

DECLARATION

Above mentioned details stand true to the best of my knowledge & belief.

CAREER OBJECTIVE

-In quest of getting opportunities that utilise my tech-stack as a software development engineer in AI/ML or backend space.

- Crafting AI & Generative AI Solutions with Python and Backend Development Expertise.

CONTACT DETAILS

Phone contact: +916394229640

Email: zulfequarsanobar@gmail.com,

QUALIFICATION

Bachelor of Technology in Computer Science Engineering.

WORK EXPERIENCE

ACCENTURE

Client: Global Pharmaceutical Company

Profile: AI/ML Computational Science Analyst

Role: Software Development Engineer

Industry: Health & Life Science

October 2022- Present day

ACHIEVEMENTS

- Accenture java Training with certification.
- Accenture ACE Bright Beginner Award for FY'23.
- Accenture ACE Inspiring Innovator Award for FY'24.
- Accenture GEN AI Mastermind Quizathon Finalist.
- Recognized and appreciated multiple times for exemplary client service providing market edge and excellent performance.
