EXPERIENCE

Fullstack AI/ML Developer Intern | CloudRedux

08/2024 – Present

- Optimized Tesseract OCR processing times, reducing the typical local system runtime from 1.8 seconds to 0.16 seconds **Reducing 100% - 125%** without using multiprocessing.
- **Implemented a Hybrid version of the Supervisor REWOO ReACT Approach**, Achieving a **40% Enhancement** in Quality Response.
- **Led the Parsing of Unstructured Documents into a Structured Format**, resulting in a **20% to 50%** Improvement in Response Quality and System Accuracy.

Junior AI/ML Intern | Acencore

01/2024 – Present

- **Led a 6-person AI team** in developing, **14+ Generative AI and Deep Learning Features**, resulting in the creation of an arguably best-in-class AI Job/Recruitment Platform.
- **Optimized Critical AI Feature**, achieving a **83% - 84%** reduction in key product processing time (**from 45-60 seconds to 7-10 seconds**).
- **Designed and Implemented a Hybrid Heuristic Candidate Evaluation System**, leading to a projected **25%+** improvement in recruiter and interviewer insights into candidate suitability.

System/Database Intern | Ambika

01/2024 – 06/2024

- **Assisted** in Migrating database from Microsoft SQL to SQLite, **achieving 15x-20x Faster Query Execution** and **Enhanced Application Performance**.
- **Automated** data validation processes, Resulting in a **60% Reduction In Error Rates** and ensuring Data Accuracy and Integrity.
- **Developed a User-Friendly Data Entry Frontend**, leading to an **50%** Increase in Data Logging Efficiency.

Lab Assistant | G H Raisoni College of Engineering and Management

07/2022 – 12/2022

- **Instructed a Data Preprocessing Lab for 60 students**, equipping them with **Data Cleaning, Transformation, and Reduction Techniques** to ensure data quality.
- **Boosted student proficiency** in data processing tools by **15%** (Measured by Class Assessment Tests) through hands-on instruction in Python, NumPy, Pandas, and Scikit-Learn.
- **Provided personalized support** to all **60** students, ensuring their understanding of concepts and successful completion of assignments.

PROJECT

Docxter

- **Designed a Hybrid Parsing Architecture** with Custom Logic and 2+ libraries, Optimizing Document Processing and Enhancing Accuracy and Speed in **Extracting Structured Information**.
- **Expanded user input capabilities** from **4 to 10+** fields, Significantly Improving User Interaction and Data Extraction Efficiency.
- **Contributed to the development of AI agents**, improving the system's ability to understand and respond to user queries with high precision.

EDUCATION

BTech – Artificial Intelligence

G H Raisoni College of Engineering and Management

10/2021 – 07/2024

Diploma – Mechatronics

Indo-German Tool Room

07/2018 – 05/2021

TECHNICAL SKILLS

Languages : Python, Octave, R

Data Analysis and Visualization : Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Tableau

Machine Learning and Deep Learning : Natural Language Processing, TensorFlow, PyTorch, Scikit-learn, Keras

Generative AI : SentencePiece, LLM, Hugging Face Transformers, Langchain

Others : Git, Linux Shell Scripting, GCP, AWS, Next.js

CERTIFICATIONS

Neural Networks and Deep Learning  | Coursera

07/2021

Machine Learning  | Coursera

05/2023
