

PROFESSIONAL SUMMARY

Application Analyst with 1.5 years of experience in manual testing and customer support. Completed an AWS & DevOps course, gaining hands-on expertise in cloud technologies and automation. Eager to apply skills in delivering innovative solutions and optimizing workflows.

EDUCATION

Malnad College of Engineering

Bachelor's Degree in Civil Engineering (B.E.)
9.3 CGPA

QSpiders Software Training Institute

Software Development Engineer in Test (SDET)
2023

MicroDegree Institute

AWS & DevOps
2024

SKILLS

- **Manual Testing:** Expertise in creating test cases, executing test plans, and documenting results.
- **Customer Handling:** Strong interpersonal skills with experience in managing customer expectations and resolving issues.
- **AWS Skills:**
 - Hands-on experience with IAM, EC2 instance management (including CLI, PuTTY, OpenSSH, and file transfers), and scaling techniques (vertical, horizontal, ELB, ASG).
 - Practical knowledge of S3 buckets for storage, static website hosting, CloudFront for content delivery, and RDS for database setup.
 - Implemented a 3-tier architecture integrating EC2, RDS, and VPC, with web server configuration and Git-based code deployment.
- **DEVOPS Skills:**
 - Proficient in Linux commands and experienced with Git for version control, including branching, conflict resolution, and repository management.
 - Hands-on experience with Ansible for instance configuration, Docker for containerization, and Kubernetes for container orchestration.
 - Developed a CI/CD pipeline in Jenkins, integrating Docker containers to automate application deployment.

PROFESSIONAL EXPERIENCE

Application Analyst

Vegam Solutions | April 2024 - Present

- Continued addressing customer issues and implementing bug fixes to ensure smooth application functionality.
- Gathered and analyzed customer requirements, collaborating with developers to deploy updates and enhancements to production.
- Contributed to the Label Team, focusing on resolving printing-related issues and optimizing related processes.

Technical Support Engineer

Vegam Solutions | July 2023 - March 2024

- Received comprehensive training on the company's product sfs application, developing a deep understanding of its functionalities.
- Managed and resolved service tickets raised by customers through ServiceNow, including debugging and providing solutions.
- Communicated with customers via call or email as needed, ensuring clear and effective resolution of their issues.
- Coordinated with developers for bug fixes, releasing hotfixes to production as required
- Monitored server performance to ensure optimal operation and address potential issues proactively.

KEY STRENGTHS

- Positive attitude with strong self-belief.
- Creative problem-solving and smart work approach.
- Persistent and responsible in fulfilling tasks.
- Patience and sound decision-making skills.
- Effective team player with a focus on collective success.
- Continuous learner with a commitment to professional ethics.
