WORK EXPERIENCE

Zscaler

Mohali, IN | Hybrid | Nov 2023 - Present

Sr. Software Development Engineer

- Modernized legacy UI architecture by migrating from Backbone Marionette to **React.js**, cutting page **load times by 40%** and enhancing maintainability through declarative design and React Hooks.
- Led the **React 18 upgrade** across the codebase to leverage modern features such as concurrent rendering and automatic batching, resulting in a smoother user experience and optimized rendering performance.
- Built **reusable, scalable** components for the in-house design system, ensuring UI consistency across products.
- Following Test-Driven Development practices. Writing unit and integration tests using **Cypress** and helping define the overall testing strategy to achieve 100% code coverage.
- Collaborated cross-functionally with UX and backend teams to design and integrate secure, high-performance APIs, elevating product reliability and scalability.
- Participated in code reviews, contributing to shared code quality and knowledge transfer.

Borderfree Technologies

Hyderabad, IN | Remote | Feb 2022 - Aug 2023

Software Engineer

- Implemented and Optimized two-way guest feature for live streaming that **allowed** the admin to invite viewers to join live shows and **enabled** viewers to request to join the studio. This **resulted in** a significant increase in admin-viewer interaction, engagement, and sales by 20%.
- Developed the Brand-setup flow, **enabling** merchants to create and register their brands on **REVO** and connect their respective shops, such as Shopify, Magento, and WooCommerce. This **improved** brand management and boosted merchant engagement.
- Introduced the Campaigning Flow and dynamic UTM Link generation and **stored** UTM tags in the database to facilitate brands in accurately tracking their consumers' redirections. This **empowered** brands with valuable insights for data-driven decision-making.
- Integrated essential social media login and registration functionality, **providing** users with a convenient and secure access gateway to the platform. This **enhanced** user experience and accessibility.
- Enhanced code quality by **developing** generic reusable components and introducing Lazy loading, Custom hooks, useCallback, and useMemo, **resulting** in a remarkable average product performance boost of 15%.
- Documented all the backend APIs used in REVO, **aiding** clients and developers in understanding the complete flow. This **facilitated** smoother collaboration and system comprehension.
- Utilized a diverse Tech stack: JavaScript, Typescript, ReactJs, HTML5, CSS3, TailwindCSS, MaterialUI, Golang, AWS.

EDUCATION

B.Tech in Electronics and Communication Engineering, UIET Panjab University

2017-21, Chandigarh, IN

SKILLS

- Language:** JavaScript(ES6+), Typescript, Python
- Web Technologies:** ReactJS, React Router, Redux, HTML5, CSS3, TailwindCSS, Material UI
- Testing & Tools:** Cypress, Postman, Git, Chrome DevTools
- Dev Practices:** TDD, Lazy Loading, Memoization, Custom Hooks, Performance Optimization, Object-oriented design
- Other Tools:** Github, Figma, Jira, BitBucket, REST APIs

PROJECTS

Laundry Services Apprenticeship

Dec 2021 - Jan 2022

- TechStack used: JavaScript, ReactJS, NodeJS, ExpressJS, MongoDB, Bcrypt, JSON web token
- Developed backend APIs for data insertion and retrieval and designed MongoDB database schema.
- Created UI components: Header, Footer, User Login, Create Orders Form using React and managed frontend routes with react-router.
- Established frontend-backend communication with fetch API for data exchange.
- Github link**

ACHIEVEMENTS

- 2023 - Certified Coding Specialist **link**
- 2023 - Achieved certification in Javascript **link**
- 2023 - Achieved certification in ReactJs **link**
