Education

- Rishi MS Institute of Engineering and Technology for Women**
Bachelor of Technology – Computer Science and Engineering; GPA: 7.3
Hyderabad, India
December 2020 - June 2024
- Sri Chaitanya Junior Kalasala**
Intermediate-MPC; CGPA:9.0
Hyderabad, India
June 2018-March2020
- Vignan Vidyalaya**
CBSE (10th); CGPA-8.0
Hyderabad, India
June 2017-May 2018

Skills Summary

- Languages:** C, JAVA (Core Java), HTML, Basics Of CSS, SQL.
- Tools:** MS Window, Edit Plus, Visual Studio, Eclipse.
- Platforms:** Window11,10,8.
- Soft Skills:** Leadership, Time Management, Communication Skills, adaptability.

Projects

- Personal Desktop Notification Reminder:** Developed a desktop notification application using Python's Tkinter for UI and schedule module for managing notifications.
- Spotting of Cyber-attack using ML in IOT Network:** Designed and implemented a machine learning-based system using Python, scikit-learn, and deep learning frameworks to detect cyber-attacks in IoT networks. Implemented machine learning algorithms such as decision trees and deep neural networks to identify cyber-attacks. Evaluated the model using precision, recall, f-score, and accuracy metrics.
- Retail Store Billing System with Coupon Validation:** This project is a simple billing system for a retail store. It allows users to calculate their bill with discounts and validates a coupon for regular customers. The system offers a 10% discount to all customers during a sale and an additional 10% discount for regular customers with valid coupons. Validation of coupon is also done with the condition. The project demonstrates the use of conditional statements, loops, and user input validation in Java.
- Gadget Management System with OTP Authentication and List-Based Operations:** This project is a gadget management system that includes user authentication via OTP and basic functionalities for managing gadgets. Users can insert, update, remove, and display gadgets in their workspace, with all gadget data being stored and managed through the List interface. This project demonstrates the use of user authentication, list-based operations, and basic control structures like loops and switch-case statements in Java.

Achievements

- Presented seminar on topic "Green Computing".
- Delivered technical seminar on "Robotic Process Automation (RPA)".
- Completion certificate in 6-week internship program at IBM (Front End Development - FED).
- Completion certificate in CSS Exercise at IBM Skill Build.

Experience

- In Amigos Foundation-Social Media Marketing**
Promoting on different social media platforms.
February 2022 - February 2022 (3 weeks)
- Pinkishe Foundation-Social Media Marketing**
Participated in virtual talks focused on promoting the empowerment and advancement of women in the workplace, working on campaign promotions
August 2021-September2021
- Safe City Safety Champion - Social Media Marketing**
Promoted an application aimed at women empowerment and safety through social media campaigns.
March 2021 - April 2021
- Kindness Unlimited - Kindness Influencer**
Participated in online campaigns to promote acts of kindness and community support.
Helped organize virtual events and shared kindness stories.
March 2021 - April 2021

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
