PROFILE

- Enthusiastic Java developer, eager to contribute to team success through hard work, attention to detail, and excellent organizational skills.
- A clear understanding of Banking and financial domains and training in JAVA/J2ee motivated me to explore new technologies.

SKILLS

- Languages: Core Java, Solidity, javascript.
- Frameworks: J2EE, Servlet, JSP SpringBoot, Struts, Spring f/w, Hibernate, JPA.
- Databases: Oracle, MySQL, MongoDB, PLSQL, PostGres
- BuildTools: Ant, Maven
- Java design patterns, Microservice design patterns, CQRS, and SAGA.
- Other Technologies: XML, JSON, microservices, HTML. Spring Security, spring data JPA

EXPERIENCE & PROJECTS: 9 YEARS

Logistics warehouse project: -contract with koorier.ca 13 July 2023-31 Oct 2023

- Pioneered warehouse application facilitating seamless integration of e-commerce parcels into the database, utilizing Java 11, SpringBoot, Spring, Junit, and Postgres.
- Developed third-party API to resolve parcel locations, aiding route creation and delivery order determination.
- Led backend team for API development leveraging Spring Boot, MySQL, and Hibernate JPA; designed and developed all microservices.
- Implemented scheduled route creation and database backup process, improving logistics efficiency.
- Provisioned a dedicated app for drivers, enabling employees to track driver location and monitor delivery statuses.
- Technologies: Java 11, Springboot, Spring Data JPA, AOP, MongoDB, Postgres, Kafka, CQRS design pattern.

Open Banking API: -Freelancing Dec 2022-April2023

Fintech startup project to create a secure API for open banking that follows FAPI standards. Tasks include:

- Creating signed JWTs, X-JWTs, and validations
- Asymmetric key validations and mTLS, Spring Security
- Creating public and private keys

- Channeling data in a secure manner between different microservices
 - Storing secured data in HashiCorp Vault
 - Creating an API to interact with Vault
 - Java 17, SpringBoot, Postgres, Spring Vault, Keycloak, Spring Security, Spring Data, JPA, Spring AOP
-

Payment system: *VSolveglobal* Jun 2022 - Nov 2022 • Maintaining and developing CR for HDFC bank's cross-border payments system

- creating modules that help bank employees generate reports on the history of transactions •
- The technology used Struts, Spring, JSP and Weblogic, Oracle.
-

Skill set portal: *Inadev* Jan 2022 -June 2022

- Leading backend team for API development using Spring Boot .mysql, JPA. •
 - design and development of all microservices.
 - assisting junior developers.
 - Handling all releases & coordination with the frontend team.
-

Freelancing in exchange platform project for cryptocurrencies and forex. May 2021 -Jan 2022

- Participation in developing microservices API, AWS cloud, and gateways using Spring Boot. •
- I was handling complete integration with Redis, Kafka, MongoDB, and MySQL in the project deployment.
- Making back-end work with frontend UI in Vue js.

Senior Java developer, Optizm Consulting Pvt. Ltd | Pune Sept 2012– July 2015

- Participation in the development of an Internet banking application for ANZ bank at Client location SYBASE

- Participate actively in the software development lifecycle, including requirement analysis, design, development, enhancement, and maintenance
- Share best practices within and across development team members
- Ensure solid, minimal-defect code by performing unit testing with JUnit test cases and through rigorous integration testing of the entire application
- Handling manual deployment processes to the WebSphere server
- Technologies used struts2, hibernate, oracle, JSON, JavaScript

Senior Software Engineer, HSBC | Pune April 2011– May 2012 • Participation in developing and maintaining applications for investment banking

2

- Engage in migrating an application to the Websphere server
- Active participation in domain knowledge acquiring of FOREX and BONDS market • Prepare detailed design documents and perform coding/resolutions assignments for the team • Building fully automated deployment processes using Maven

Software Engineer, Atos Origin | Pune June 2008– Feb 2011

- Development and maintenance of e-commerce web application of P&G Babycare products • Provide production support Helpdesk ticket assistance with analysis and research of production problems, user questions, and system usage inquiries
- Ensures that recoveries and resolutions are performed within established standards • Participation in enhancing modules performing coding, database queries, and UI designing. • Technologies used Struts2, JSP, MySQL, and Hibernate.

Software Engineer, SoftPolynomials India Pvt Ltd. | Nagpur Feb 2007– Aug 2007

- Engaging in application architecture and design decisions
- Participation in the design, development, testing, and deployment process
- The technology used JSP, servlets, javascript, HTML, CSS

Java Developer and Trainer, Chester Info Archive | Nagpur April 2005– Aug 2006

- Engaging in application architecture and design decisions

- Participation in the design, development, testing, and deployment process
- The technology used JSP, servlets, javascript, HTML, CSS

EDUCATION

Master of Science Nagpur University *Information technology* 2005

Bachelor of Science Nagpur University *Mathematics, Electronics* 2002

CERTIFICATIONS

Diploma in Software Technologies MKCL, Pune *java/J2ee* aug 2006-feb 2007

SCJP June 2010 *java 1.5*

Pixeltests IIT madras blockchain developer June 2022 Ethereum, Solidity
