EXPERIENCE

Software developer

GoKwik

📅 April 2023 – Nov 2023 📍 Remote

- Implemented the foundational components for message validation in a messaging API system to ensure data integrity and security in Nodejs.
- Developed custom features: abandoned checkout management and popup functionality in nodejs, enhancing conversion rates and user engagement.
- Rectifying bugs, adding new features in application modules as per requirements.
- Refactored and modularized the codebase, reducing technical debt and improved code maintainability.

Software Development Engineer

Propelld-fintech

📅 June 2022 – Dec 2022 📍 Bangalore

- Implemented API endpoints and wrote efficient, modular code in **Typescript, Nodejs**. Also worked on writing test cases.
- Worked on debugging and fixing bugs in production codebase. Was part of team involved in migration of services to API gateway.
- Integrated 3rd party APIs and wrote code to use data coming from there to enhance the existing communication API to support media communication through whatsapp.

Software Development Engineer Intern

Propelld

📅 January 2022 – June 2022 📍 Remote

- Developed a web app from scratch using NodeJS and Typescript by writing server side code and APIs.
- Wrote efficient database queries in MongoDB and learnt and implemented rate-limiting, error handling and authentication using **JWT**.
- Worked on a project for PDF data and digital signature information extraction and verification using **springboot** and Apache Tika.

TECHNICAL SKILLS

- **Web development** - Typescript, NodeJs, ExpressJs, NestJs, Springboot, Mongoose, HTML, CSS
- **Languages** - C, C++, Javascript
- **Database** - MySQL, MongoDB, PostgreSQL
- **Miscellaneous** - Git, Maven, Postman, Linux.

COURSES

- Data Structures and Algorithms
- Operating Systems
- Computer Networks
- Database Management Systems and SQL

EDUCATION

B.Tech. (CSE) - 8.61 CGPA

Silicon Institute of Technology, Odisha

📅 August 2018 – May 2022

ACHIEVEMENTS

- Solved over 500+ problems on Leetcode, GeeksForGeeks
- Hackerrank Problem solving (Intermediate), SQL(Intermediate) certification.
- Achieved 5 star on Hackerrank.

PROJECTS

Bookstore

(Link)

- An online bookstore platform enabling users to browse, view, and purchase books. Features include user registration, login, and JWT-based authentication, along with cart management, order history, and role-based access control for secure admin functionality. Admins can manage inventory and orders seamlessly. Implemented caching for faster access to book data and pagination for seamless browsing. Built using Node.js, Express.js, TypeScript, and MongoDB.

JournalGallery

(Link)

- It is an app just like a diary that allows users to write down stuff and get it displayed and stored. Users have the option to create both private and public journals. This is built using node js, express.js, mongodb for backend and Google OAuth for authentication.

Yelpcamp- Camping Site

(Link)

- A camping website with features such as add , delete campgrounds. Users can signup/login to add comments and review campgrounds. It is made using HTML, CSS, Javascript and uses Node.js, Express.js for backend and hosted on Heroku servers. User authentication is also implemented and MongoDB is used for database.

WeatherApp

(Link)

- A Spring Boot app that consumes weather and forecast data from openweathermap api and displays current weather in the form of json. Weather client stores city and its weather in database. Using Spring MVC for exposing REST endpoints to return all locations and weather for a specific location respectively.
