

## OBJECTIVE

To contribute to a dynamic organization by leveraging my technical expertise and problem-solving skills while continuously learning and growing as a professional.

## SKILLS

### Programming Languages:

Python, C++, JavaScript, HTML, CSS

### Frameworks/Libraries:

React

### Core Concepts:

OOPS, DBMS

### Databases:

MySQL, PostgreSQL

### IDEs:

IntelliJ, VScode

### Tools:

Docker, Github

### System Design:

API Designs, Database Designs

## ACHIEVEMENTS

Mastered 400+ Data Structure challenges across diverse platforms, showcasing adept problem-solving and logical reasoning abilities.

Demonstrated leadership and communication skills by excelling in college events such as anchoring, painting, and more.

## CERTIFICATIONS

**Competitive Programming (Data Structure):**  
(GeeksforGeeks – Certification)

**Python for Everybody:** (Coursera – Certification)

## EXPERIENCE (3 MONTHS)

### HASHEDIN BY DELOITTE | SOFTWARE DEVELOPER TRAINEE

December 2023 - Feb 2024 | Bangalore, Karnataka

- Proficient in **React JS, JSX**, specializing in state management, props handling, and optimizing performance with virtual DOM. Experienced in utilizing RTK Queries for efficient data fetching across multiple front-end projects.
- Developed front end projects leveraging **React JS** with a focus on creating dynamic user interfaces and seamless user experiences.
- Implemented event handling and HTML structure to enhance the interactivity and accessibility of web applications.
- Skilled in integrating third-party libraries and APIs to extend functionality and enhance user experience in React applications.
- Proficient in component-based architecture, creating reusable and maintainable UI components to streamline development processes.

## EDUCATION

### CHANDIGARH ENGINEERING COLLEGE, LANDRAN

B.TECH IN COMPUTER SCIENCE

2019-2023 | %age: 81.0%

### MPD DAV PUBLIC SCHOOL, KALANWALI

XII (SENIOR SECONDARY)

2019 | %age: 81.2%

### MPD DAV SCHOOL, KALANWALI

X (SECONDARY)

2017 | %age: 81.6%

## PROJECTS

### LEAVE MANAGEMENT SYSTEM

Dec 2023 - Jan 2024 | Front end developer

- Developed a Leave Management System from scratch using React.js, ensuring a seamless frontend experience.
- Utilized React Hooks, Redux, and React-Redux Toolkit Query for state management and data fetching.
- Implemented front-end exception handling techniques, ensuring application stability and reliability.

### TABLE RESERVATION SYSTEM

Jan 2024 - Feb 2024 | Front end developer

- Improved booking efficiency by 20% by integrating RESTful APIs and optimizing state management with React Hooks and TypeScript.
- Implemented TypeScript for frontend type safety and React Hooks for efficient state management.
- Integrated with RESTful APIs for seamless frontend-backend communication.

### SPLIT WISE APPLICATION

Feb 2024 | Front end developer

- Developed a Split-wise application with React.JS for seamless expense management and sharing.
