WORK EXPERIENCE

Software Development Engineer I | Nuclei

July, 2023 – Present

Android Developer | Java, Kotlin, Android, SDK, Firebase

- Engineered frontend features for the FedMobile application, contributing to its **10Mn+ downloads** and enhancing user experience which led to a **20% increase in daily active users**.
- Achieved proficiency in the full product development lifecycle, focusing on consumer-facing applications. Utilized Object-Oriented Analysis and design methodologies, leading to a **60% increment in build delivery rate** to the client.
- Architected robust Android applications employing Dagger for dependency injection, JSON for data interchange, and RESTful Web services; optimized code.
- Built multithreaded Android applications using Android Studio, Kotlin, and RxJava, designed MVP architecture and Room Database to enhance performance, resulting in a **40% improvement in app load times, responsiveness and minimized ANR occurrences**.
- Improved app stability by identifying, diagnosing, and resolving software bugs on time, which resulted in the **reduction of crash-free users by 35%**.
- Led the development and integration of new UPI features, **increasing transaction success rate by 20%** and enhancing user satisfaction, contributing to a rise in monthly transactions.

Software Development Engineer Intern | Nuclei

January, 2023 – June, 2023

Android Developer | Java, Android, SDK, Firebase

- Gained a deep understanding of the Android platform and on client-server architecture in mobile applications.
- Conceptualized and designed intuitive user interfaces, seamlessly integrated API, and optimized performance metrics, **reducing customer complaints by 25%**

EDUCATION

Siddaganga Institute of Technology

B.E. - Computer Science & Engineering, CGPA: 9.24

Tumkur, Karnataka

August, 2019 – July, 2023

Satyam International School

Class 12 CBSE

Patna, Bihar

May, 2018

Shivam Convent

Class 10 CBSE

Patna, Bihar

May, 2016

PROJECTS

Fit Verse | MVVM, Kotlin, Coroutines, Jetpack compose, Dagger Hilt, RoomDB, DataStore, LiveData

- A fitness tracking app for Android that integrates with Health Connect to monitor daily activities. FitVerse visualizes your activity proportions with a dynamic donut chart, providing insights into steps, exercise, sleep, and distance. This project showcases the use of Compose for UI design and animation, aiming to enhance user engagement through interactive and visually appealing data representation..

Automatized Project Registration | React, Django, Firebase

- Led the creation of a web-based project management system, integrating functionalities for admin, faculty, and students; streamlined processes for topic selection, team formation, and performance evaluation, enhancing overall process efficiency by 90%.

TECHNICAL SKILLS

Languages: Kotlin, Java, C, C++

Frameworks: Android development, SDK, Coroutines, Jetpack Compose

Developer Tools: Git, Firebase, RoomDB, Android Studio

ACHIEVEMENTS

Smart India Hackathon 2022: Qualified at institute level

Google Hash Code 2021: Participated in a team of 4 and secured an India rank of 1193 and a world rank of 4081.
