Bangalore, India

BACKEND DEVELOPER

Results-driven and dedicated Backend Developer with a comprehensive skill set in various programming languages and utilities. Proficient in handling diverse aspects of the development process with efficiency. A collaborative team player possessing technical, creative, and analytical skills, offering two years of valuable experience. Open to embracing new technologies, particularly those related to frontend and cloud computing.

KEY COMPETENCIES

Java	JavaScript	Service Now	Team leadership
Ansible	HTML5	Jenkins	Communication
SQL	CSS	Spec Builder	Client relationships
Spring Boot	AWS	Swagger	Business understanding

PROFESSIONAL EXPERIENCE

Perficient Pvt Ltd Technical Consultant

**Dec 2021- Present
June 2024**

In just two plus years, I achieved an exceptional 120% growth by spearheading development initiatives. I optimized resource utilization, enhancing operational efficiency. A pivotal move involved automating manual tasks, reducing errors and boosting overall productivity.

Accomplishments:

- Working on Java 8 , Spring-boot for adding services connected with the backend SQL and postgres for onpremises and cloud work
- Using microservices, jenkins CI/CD for deploying the code in UAT, STAGE & PROD.
- Handling OCP
- Have hands on Spec builder for checking the files error and severity and fixing changes
- Utilized a diverse set of programming languages and utilities to enhance system capabilities.
- Client solution provision
- Orchestrated artifact deployment using Ansible

Associate Technical Consultant

May 2022-May 2024

- Developed shell scripts to enhance alert mechanisms and streamline mail monitoring processes
- Incident resolution, client escalation management
- Leveraged to work on PROD
- Maintained compliance with HIPPA framework and protected sensitive patient data(PHI) in healthcare-related projects.
- Agile methodology
- Created healthcare project for Edifecs routes/profiles, optimized data processing/transmission
- Developed and maintained robust backend systems, ensuring optimal functionality and performance.
- Collaborated with cross-functional teams to analyze requirements and implement scalable solutions.
- Contributed to the design and implementation of APIs for seamless integration with frontend applications.
- Participated in code reviews, identifying and resolving issues to maintain code quality and standards.
- Actively engaged in troubleshooting, debugging, and optimizing code for improved efficiency.
- Successfully deployed code to production environments using CI/CD pipelines, ensuring rapid, reliable, and automated delivery of software updates.

Internship

Dec 2021-April 2022

Possessed comprehensive experience in full-stack development, the Software Development Life Cycle (SDLC), soft skills, team leadership, and sprint planning.

Accomplishments:

- Conducted a Proof of Concept (POC) project for an NGO website, focusing on database administration and website design.
- Led the development of the website's logic for booking slots with counselors, streamlining appointment scheduling for users.
- Utilized technologies such as ReactJS for front-end development, NodeJS for server-side scripting, and MongoDB for efficient database management.
- Collaborated with the team to create an intuitive and user-friendly web interface, enhancing the overall user experience
- . Successfully delivered the project within the specified timeline, demonstrating strong project management and problem-solving skills.
- Gained valuable hands-on experience in web development and database administration.

CERTIFICATIONS & AWARDS

CERTIFICATES

API Academy Certification Program

- API Designer
- API Security Architect
- API Product Manager

Full Stack Development:Beginner Full Stack Web Development: HTML, CSS, React & Node - Mark Wahlbeck

Object Oriented Analysis, Design & Programming with UML - Umar Lone

SOLID Principles: Introduction Software Architecture & Design - Sujith George

AWARDS

Extra Miles Award - Q2 / 2024

Infosec KYC Winner - Q3 / 2023

EDUCATION

Christ University
