Summary

As a **SQL Developer**, **Data Analyst**, and **PL/SQL Developer** with 3 years of experience, I have managed and optimized the **State Bank of India database** at **Tata Consultancy Services (TCS)**. My expertise includes **SQL**, **PL/SQL**, and **database management**, with hands-on experience in **Power BI** for **data analysis** and **visualization**. I am also advancing my skills in **Python** and **artificial intelligence (AI)**. I am eager to apply my technical skills to drive organizational success in my next role.

Professional Experience

Data Analyst

Tata Consultancy Services, Thane(Maharashtra)

[October 2021] – Currently serving [**SBI Core Banking Solutions – Business Domain**]:

At SBI, India's largest public sector bank, I contributed to the B@NCS24 application, encompassing over 400 screens for end users to conduct a wide array of banking transactions, generate reports, and manage parameter settings.

- **Implement Core Banking Solutions:** Successfully implement core banking solutions at client sites, enhancing understanding of banking processes and functionalities.
- **Manage Bank Data:** Effectively manage bank data by troubleshooting database-level production issues and resolving problems arising from daily data processing jobs.
- **Lead Database Administration:** Oversee the administration of database objects, conduct impact analyses postchanges to ensure operational integrity and system stability.
- **Direct Departments:** Efficiently direct various departments and train new hires to align their efforts with business objectives and company goals.
- **Evaluate and Track Issues:** Evaluate, document, track, and monitor issues meticulously to ensure timely resolution and maintain operational efficiency.
- **Develop Data Reports:** Develop logic to systematically extract and format data into Excel/CSV reports, meeting diverse reporting requirements.
- **Craft SQL Queries:** Craft complex SQL queries and scripts tailored to client specifications, ensuring accurate data retrieval and manipulation.
- **Engineer Database Objects:** Engineer complex database objects, including Stored Procedures, Functions, Packages, tables, indexes, and Triggers using SQL and PL/SQL.
- **Execute UNIX Commands:** Proficiently execute basic UNIX commands to enhance system management and administrative capabilities.
- **Collaborate with Teams:** Collaborate closely with the PSO team and Development Team to ensure business continuity by effectively troubleshooting production issues.

KEY RESULT AREAS:

- Spearheading the process of gathering, analyzing, and finalizing technical and functional specifications.
- Proficient in SQL development with a proven track record of delivering 24/7 production support.
- Strong command of DDL, DML, and TCL commands through extensive hands-on experience.
- Collaborating effectively with team members to optimize project management and execution.

- Engaging with internal and external clients to define precise requirements and specifications, ensuring high-quality deliverables meet client expectations.
- Proficient in MS Excel and Power BI with strong project management, organizational, and situation

Skills

- **Technical Skills:** Oracle SQL, PL/SQL, PostgreSQL, MySQL, Advanced Excel, Basic Python
- **Tools:** SQL Developer, ISQL plus, PG Admin, Power BI, MS Excel, Jupyter Notebooks, Putty

Education

B.E. [Bachelor of Computer Engineering]

Terna Engineering College , Nerul , Navi Mumbai

[August 2017] – [August 2021]
