PROFILE SUMMARY

Working as a Cloud Engineer with 2+years years of experience and strong knowledge and hands on experience in implementing Azure cloud services and managing clients Azure based projects, Troubleshoots, monitors and optimizes Azure resources.Handling p1 and p2/p3 ticket for the production environment effective in maintaining cloud infrastructure with automation and configuration tools,contributing to planning , implementation and growth of the infrastructure on public cloud services.Seeking a challenging role to leverage expertise in Azure IaaS and PaaS to improve cloud performance, reliability, and scalability.

EDUCATION

Bachelor of Computer Science	Sri Krishna Arts and Science College	2019 - 2022
CGPA-8.1		Coimbatore, India

SKILLS

Technology	: Azure, AWS
Azure Services	: IAAS/PAAS/SAAS(O365)
Azure Networking	: Vnet, NSG ,Load balancers, Firewalls ,DNS
IAM	: Azure AD(Microsoft Entra ID),Multi-factor authentication (MFA)
Monitoring Tools	: Prisma Cloud , Service Now , Azure Monitor
Operating System	: Linux, Windows and Windows Server 2012R2
Scripting Language	: Powershell, Networking fundamentals (CCNA)

EXPERIENCE

Azure Administrator -	Aug 2022 - Present
LTIMindtree	

Project : Portland General Electric(Utilities)	Hyderabad, India
---	------------------

- **Skills and Responsibilities:** Azure Architecture Administration . Cloud Migration Analysis and Implementation · Cost Optimization· Cloud Security. Windows Server Technology .Incident Management ·Change Management · Servicenow
- Managed large-scale enterprise applications on **Windows VMs** in the Azure environment.
- Design and develop Azure Logic apps, Including Sentinel, Application Gateway, Traffic Manager and Express Route.
- Experienced with Azure devops .Experienced with Azure information protection. Experienced with Azure Sentinel.
- Storage account creation and configuration and vulnerability remediation for azure resources.
- Provided **24/7** monitoring in **SQL Managed instance/Azure VM /Backup Vault** and **Containers**.
- Working experience in the Restoration of VM , Disaster Recovery testing , disaster recovery configuration using ASR(Azure Site Recovery)

- Implemented and Configured Network Security Group(NSG) flow logs for Azure virtual networks to enhance network traffic monitoring and security analytics
- Configured Azure Backup Center's underlying data source, duplicated, backedup, and decommissioned the backup vaults which were not in use which saved **400 USD** on LRS/ZRS
- Provided a **Cost-Saving** initiative by identifying unused Azure resources and establishing **Storage account expiration policies**, leading to an annual cost reduction upto 20 percent in azure expenditure.
- Implemented and managed **Azure Prisma** cloud solutions and remediated azure resources as per Prisma alerts.
- Developed automation scripts using **Powershell** to streamline common operational tasks, leading to increased operational efficiency and reduced manual intervention.
- Experience in designing and implementing azure backup and recovery.
- Performed Regular audits of Azure resources to ensure compliance with security standards.
- Successfully configured and enhanced security posture using Microsoft Defender for Cloud to protect Azure environments against threats, resulting in a 30 percent reduction in security incidents.
- Proficient in troubleshooting Linux related issues. Maintained the availability of VM's on azure assisted customers with RDP ,VM no-boot, VM reboot issues and provided root cause analysis to customers.
- Analyzed security recommendations provided by Microsoft Defender for Cloud and implemented best practices, increasing overall security scores by 40 percent across all Azure subscriptions.
- Experienced with **Azure AD**, Active Directory including managing/maintaining **GPOs**
- Proficient in AWS services like **VPC, EC2, S3, ELB, EBS, IAM, Cloud Watch**
- Created multiple **VPC's** and public and private subnets as per the requirements and distributed them into various availability zones.
- Have done patching on **EC2 server** using System manager maintenance window and automated the schedule
- Monitored **AWS billing** and done cost-optimization of AWS resources.
- Worked on developing a knowledge-based articles addressing identified issues within the customer's environment.
- Good exposure of **ITIL and ITSM** process and ServiceNow tool for Incident, Service- request, Change management, Vulnerability tickets and Problem task with RCA
- Insuring **24x7 support** for Production ,Development, Staging/testing and training environment in day-to-day activity to ensure zero alert threshold is met.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals - [Az 900](#)
- LTIMindtree Certified Cloud and Infrastructure Services Professional
- Microsoft Certified Associate AZ-104
