

ROHIT BOHRA

ML Engineer/Data Scientist

+91 9611901656 | Rohitbohra23051994@gmail.com

[Github: bohraboxer](#)

Professional Summary

Passionate Machine Learning Engineer and Data Scientist with about four years of industry experience across various domains including healthcare, social media marketing, AR, and marketing. Proven ability to lead small teams and committed to professional growth and continuous learning. Skilled in developing AI-driven tools and models, with a focus on optimizing performance and user engagement.

Employment History

FreeLancer

June 2023 – Present

- **AI BhagwatGeeta Bot:** Developed an AI bot designed to provide guidance on life problems by referencing the teachings of the Bhagwat Geeta. The data preparation involved converting audio files from a Bhagwat Geeta podcast into text, followed by generating question-answer pairs using OpenAI's models. Fine-tuned and quantized Llama3 using the Unsloth framework. The application was containerized with Docker for easy deployment and scalability.

Technologies Used: Python, Langchain, GPT-3.5, GPT-4, Llama, Docker.

- **Ethnobotany Search Engine:** Created a search engine application that retrieves and verifies information from the internet based on user queries. This was achieved using Langchain and LangGraph, enabling agents to collaborate and cross-check information before delivering accurate results.

Technologies Used: Python, Langchain, LangGraph, GPT-3.5, Docker, AWS.

Machine Learning Engineer

Listen2.It, Bengaluru

April 2023 – June 2024

- **AI-Driven Sales Training Tool Development:** Led the design and implementation of an AI-based training platform using GPT-3.5, programming interactive simulations where sales reps engage with AI as potential customers, receiving real-time feedback and performance scoring to improve sales techniques.
- **Text to Speech (TTS) Tool Innovation:** Pioneered the development of a multilingual TTS tool optimized for cost and performance, achieving a fourfold cost reduction while maintaining quality. Successfully integrated the tool across diverse languages including Hindi, Indian English, Tamil, Kannada, Telugu, and Malayalam.

Technologies Used: Python, Langchain, GPT-3.5, GPT-4, Pinecone, Pytorch, AWS.

- **Key Clients:** Aakash Institute, Tata Telecommunications.

Machine Learning Engineer

Instoried Research Labs Pvt. Ltd., Bengaluru

September 2020 - March 2023

- **Emotion and Tone Analysis Tools:** Developed tools for analyzing and optimizing the emotional content of text in real-time, increasing user engagement and satisfaction. Utilized NLP techniques and ML models to provide actionable insights and recommendations to content creators.
- **Content Optimization AI:** Crafted AI-driven features such as plagiarism detection, sentiment analysis, and automatic paraphrasing, significantly enhancing content quality and creativity for digital marketing platforms.

Technologies Used: Python, BERT, GPT-3, other open-source models.

Data Scientist Researcher

Freelance, Bengaluru

January 2020 - August 2020

- **Predictive Modeling for Healthcare:** Conducted comprehensive data analysis and developed a predictive model for hemophiliac patient condition monitoring, achieving 72% precision, aiding in better patient management and treatment planning.

Data Scientist and Behaviour Analyst

PlayShifu, Bengaluru

August 2019 - December 2019

- **User Engagement Analytics:** Implemented advanced data tracking and analytics for user interactions with AR educational games, leading to more informed decision-making based on user behavior insights.
- **Predictive Modeling for Game Development:** Developed machine learning models to predict user game preferences and completion times, facilitating more targeted game development and enhancing user satisfaction.

Technologies Used: Tableau, Google Cloud Platform, Python.

Machine Learning Service Intern

Sprinklr, Bengaluru

July 2018 - November 2018

- **Social Media Analytics:** Analyzed social media data to build machine learning models that predict customer behavior and preferences, enhancing brand engagement strategies.

Data Science Intern

Hemolife, Bengaluru

February 2018 - May 2018

- **Healthcare Data Analysis:** Collected and analyzed patient data to develop insights into the progression of Hemophilia, supporting the development of tailored treatment plans.
-

Education

Master of Computer Applications

Dayananda Sagar College, Bengaluru

June 2016 - May 2018

Bachelor of Computer Applications

Garden City College, Bengaluru

June 2013 - May 2016

Skills

- **Machine Learning:** Model development, feature engineering, model evaluation.
 - **Deep Learning:** Neural networks, training, and optimization.
 - **Natural Language Processing:** Text analysis, sentiment analysis, language models.
 - **Audio Model Training:** TTS development, multilingual support.
 - **Prompt Engineering:** Crafting and optimizing prompts for LLMs.
 - **Data Analysis:** Statistical analysis, predictive modeling.
 - **Cloud Computing (AWS):** Model deployment, cloud services.
 - **LangChain:** Using and integrating large language models.
 - **LangGraph:** Framework for defining, coordinating, and executing multiple LLM agents (or chains) efficiently.
 - **Pinecone:** To store and retrieve relevant data from Database for GenAI products.
 - **Tableau:** Data visualization, dashboard creation.
 - **Python:** Programming, libraries (Pandas, NumPy, Scikit-learn).
 - **Transformers (BERT):** Implementation and fine-tuning.
 - **Unsloth:** Framework used for finetuning opensource LLMs.
 - **Docker:** Dockerizing the applications
-

Publications

- **"A Comparative Model of Feature Engineering with and without Domain Knowledge":**
Demonstrates how effective feature engineering can be performed without deep domain knowledge using machine learning and deep learning techniques.
