SUMMARY

Proficient in Python, SQL, AWS Redshift, Excel, and Power BI, with a proven track record of transforming intricate datasets into actionable insights. Demonstrated expertise in data manipulation, standardization, and analysis to drive strategic decision-making. Adept at presenting insights to stakeholders and influencing outcomes through compelling storytelling and visualization. Enthusiastic about enhancing performance through data and continual process enhancement.

Skills

Category	Tools
Programming Languages	Python, SQL
Tools	Power BI, Excel, Google Sheets, Appscript, MySQL
Framework	Pandas, Numpy, Scikit-Learn, Matplotlib
Platforms	Pycharm, Google Colab, Visual Studio

WORK EXPERIENCE

Data Analyst, K12 Techno Services PVT Ltd, Bangalore

June 2023 – Present

- Scrutinized sales data to unveil patterns and pinpoint opportunities for enhanced team efficacy and revenue augmentation.
- Constructed Power BI dashboards to monitor pivotal sales metrics, oversee team KPIs, and furnish actionable insights for well-informed decision-making by leadership.
- Automated data compilation, validation, and reporting workflows utilizing Python and SQL to diminish manual labor and amplify operational proficiency.
- Standardized and upheld sales reports to ensure data precision and uniformity across departments, enriching visibility into sales undertakings.
- Engaged closely with sales, marketing, and operations teams to synchronize data-informed strategies with organizational goals, delivering impact resolutions to intricate challenges.
- Merged data from diverse sources to fabricate centralized reports and visualizations, enabling enhanced forecasting and performance monitoring.

AI Intern, Tvish Software Development (Remote)

November 2022- April 2023

- Developed AR solution for medical field, integrating ANN to enhance medical image analysis for improved diagnostics.
- Trained neural network models using TensorFlow and Keras to recognize and classify medical conditions from imaging data, supporting real-time decision-making.
- Integrated AR technology to overlay critical data and 3D visualizations onto medical images, streamlining workflow for healthcare professionals.
- Collaborated with medical experts and developers to ensure AR system met user needs and clinical standards, improving diagnostic process.
- Optimized system performance, ensuring efficient processing of large datasets with minimal latency in medical environments.

EDUCATION

Bachelor of Technology in Computer Science & Engineering
Dr APJ Abdul Kalam Technical University Lucknow, India.

2019

Projects

Credit Card Fraud Detection - [Link](#)

Detecting fraudulent transactions by identifying anomalies.

- **Data Balancing:** Implemented Synthetic Minority Over-sampling Technique (SMOTE) to tackle dataset imbalance.
- **Feature Engineering:** Augmented model accuracy through advanced feature engineering techniques.
- **Model Development:** Utilized Logistic Regression, Decision Trees, Random Forest, and XGBoost algorithms.
- **Evaluation:** Assessed performance using precision, recall, and F1-score metrics.
- **Tools:** Leveraged Python along with Scikit-learn, Pandas, NumPy, SMOTE, and Matplotlib libraries.

Face Emotion Recognition - [Link](#)

- **Developed** a CNN-based model to classify emotions from facial expressions using the FER-2013 dataset.
- **Preprocessed** images by resizing, normalizing, and applying data augmentation to improve model generalization.
- **Trained** the model with TensorFlow and Keras, optimizing performance with Adam optimizer and cross-entropy loss.
- **Evaluated** the model using accuracy, precision, and recall metrics, achieving high classification performance.
- **Tools:** Python, TensorFlow, Keras, OpenCV.
