

Rohit Saini

Software Engineer

✉ rs8387878748@gmail.com ☎ 08387878748 📍 Pune, Maharashtra

PROFILE

Professional experienced with 2 years and 11 months of hands-on experience in C++, Python, CUDA, Unit testing using cxx testframework and debugging.

Specialized in developing and maintaining software for emerging technologies such as ultrasound machines and video streaming.

Proficient in implementing efficient algorithms and data structures to optimize performance.

PROJECTS

For Medical Images, improving the performance of 2D rendering using CUDA and C++

For improving performance for 2D and 3D images created kernels with the help of parallel computing on GPU's .And created Unit test for developed code.

For video streaming API, for testing used Python scripts

Creation of API using Flask and FFMPEG for video streaming. Testing of video streaming API, for testing performance, video frames, video clips, read logs and checking timestamp using Python scripts.

PROFESSIONAL EXPERIENCE

Agiliad Technology Pvt. Ltd.

01/2022 – present

Pune

Working on the development of API for ultrasound machine using C++.

Worked on the development of ultrasound machine image rendering using **CUDA**, **SIMD** and **C++**.

Worked on **Unit testing** using cxxtest Framework and C++.

Worked on creation of API using Flask and Python.

Worked on Python scripts for testing video streaming API.

Worked on Creating documents and client handling.

SKILLS

- C/C++, CUDA, SIMD, Algorithms (DSA), Python, STL
- Visual Studio, VS code, NSIGHT CUDA debugger, MATLAB, UML, Sequence Diagram, Basic Linux.
- Tortoise SVN, Redmine, GIT, GITHUB, Pycharm.
- Debugging/Debug, Unit Testing

EDUCATION

M.tech

NIT Jaipur

In 'Power Electronics and Drives' with 7.08 CGPA

B.tech

GIT Jaipur

In 'Electrical Engineering' with 63.59%

AWARDS

Rising Star Award for Individual Performance

The Top Squad Award

GATE Qualified

COURSES

C++, Python

Udemy Academy
