EDUCATION

- NIT Rourkela** Rourkela, India
Masters of Technology - Computer Science; GPA: 8.15
Courses: Machine Learning, Information Security, Deep Learning, Neural Network
July 2018 - June 2020
- Netaji Subhas University of Technology East Campus** New Delhi, India
Bachelor of Technology - Computer Science; GPA: 7.0
Courses: Data Structures, Algorithms
July 2013 - Aug 2017

SKILLS SUMMARY

- Programming:** C++, Linux, Python, SQL, Bash, OOP, Templates, Multithreading
- Tools & platforms:** Linux, Gcc 8.2.0+, GIT, BitBucket, Tbricks/ORC FE, VeriFIX, FIX Protocols 4.2,4.4,5.x SP2

EXPERIENCE

- Trading Technologies** Pune, India
C++ Developer (Full-Time) Jul 2024 - Current
 - Market Data Team:** Recently joined the Market Data Team and would be working on Multiple Line Handlers Migration End to End.
 - Technologies:** C++, Linux, FIX4.x 5.x protocol
- Broadridge Trading & Connectivity Solutions** Bangalore, India
Software Developer (Full-time) Sep 2022 - Jun 2024
 - Budapest Stock Exchange Migration K2 to FIX:** Currently leading the Design and Development of a comprehensive FIX gateway for Budapest Derivatives and Auction markets, aimed at seamlessly integrating Market data, Trading, Quoting and IRD functionalities. Actively collaborating with the 'Budapest stock Exchange' to customize the FIX gateway according to their unique trading needs and preferences.
 - Optimization:** Slashed gateway latency by 30% with optimizations like lambdas, constexpr compile time optimizations, preprocessor directive etc., Switched to string.view for leaner memory usage, cutting down heap allocations.
 - Daily Task/Bug Fixing:** Involved in the design and development of FIX 4.2, FIX 4.4 gateways for the FIX Gateway and Connectivity team, specializing in multiple FIX flows, including Single Order, Quoting, Instrument Download.
 - Technologies:** C++, Linux, FIX4.x 5.x protocol
- Radisys Corporation** Gurugram, India
Software Engineer (Full-time) Jul 2020 - Sep 2022
 - ODU PM Counters:** Led the design and development of ODU PM Counter subscription and handling using YANG models loading, xml validation with Jio OAM manager over UDP.
 - Daily task:** Enhanced the ODU:ORU Controller: ORU FM; ORU CM; ORU PM, notification handling, validation and testing. Boosted code coverage from 17% to 83% and mitigated memory leaks by 75% using **Valgrind** and **gcov** tools.
 - Guide:** Assumed responsibility for mentoring and training entry-level engineers, providing in-depth code and design walkthrough sessions. Facilitated end-to-end validation exercises leveraging Netconf and TCP protocols.
 - Technologies:** C++, Linux, Python scripting, TCP/IP protocol

PROJECTS

- FORGERY DETECTION (M.TECH):** THESIS - 2020
Detection of copy move forged images with no prior information about the image content. A CNN model which classifies images using Multiple Convolution & Pooling layers with approx. 87% accuracy.

ACHIEVEMENTS

- Delhi Chess Open 19th Delhi International Open GM Chess Tournament New Delhi, 22-29 March 2022 — FIDE Rated
- FIDE Classic International Standard Rated Vadodara, 1st Jan 2023
- 2018 - GATE Computer Science and Engineering Secured All India rank of 2203

INTERESTS

- Chess
