

ROHITH ELAVAZHAGAN

RPA DEVELOPER

+91 8220274552 elavazhagan.rohith@gmail.com

SUMMARY

Dedicated System Engineer with expertise in RPA development and automation. Proven track record in implementing efficient solutions using C#, SQL, Python, UiPath, AA 360 and Assist Edge. Successfully delivered Enrollment Bots for the US healthcare industry, improving operational efficiency and driving innovation.

WORK EXPERIENCE

Systems Engineer | Infosys Limited

Jul 2021 - Present

- Led the development and implementation of Enrollment Bots for the U.S. healthcare industry, focusing on projects such as Premium Reconciliation, Provider Assignment, and Address Validation Welcome Kit Generation.
 - Conducted requirements gathering sessions with stakeholders to understand business needs and translate them into technical specifications.
 - Created comprehensive Process Design Documents (PPD) and Functional Requirements Documents (FRD) to guide development and ensure alignment with business objectives.
 - Managed deployment protocols using ServiceNow for ticket management, ensuring timely resolution of issues and effective change management.
 - Conducted comprehensive testing phases, including Unit Testing, System Integration Testing, and User Acceptance Testing (UAT), to ensure high-quality deliverables.
 - Collaborated with clients and stakeholders to obtain necessary approvals before production deployment, maintaining a clear communication channel throughout the project lifecycle.
 - Executed post-deployment Production Sanity Tests to validate functionality and performance; addressed defects during a dedicated 30 days hypercare period to ensure uninterrupted service.
 - Improved accuracy and streamlined processes by optimizing existing RPA solutions, enhancing overall operational efficiency.
 - Successfully handed over the projects to the production support team post-hypercare, providing thorough knowledge transfer (KT) sessions and comprehensive documentation to ensure seamless support and maintenance.
-

EDUCATION

Master of Computer Applications

Jan 2023 - Jan 2025

Bachelor of Computer Applications

Jun 2018 - Apr 2021

CORE COMPETENCIES

- **Technical Skills:** Programming Languages: C#, Python and SQL | Robotic Process Automation (RPA) | RPA Tools: UiPath, Automation Anywhere A360 and Assist Edge | Version Control: GitHub | Ticket Management: ServiceNow | Agile Methodology and RPA Life cycle
- **Key Skills:** Analytical Skills | problem - Solving | Team Work | Flexibility | Documentation
