

ROJA PACHINEELA

Senior Software Engineer | Java & Spring Expertise | Microservices & Cloud Native Systems

+91-9035565781 @ roja.pachineela@gmail.com linkedin.com/in/roja-p-554291153

SUMMARY

Senior Software Engineer / Tech Lead with 13+ years of experience in Java, Kotlin, Spring Boot, and Microservices architecture. Expertise in building scalable, cloud-native backend systems using Kafka, Redis, Docker, Kubernetes, and REST APIs. Strong experience in OAuth, SAML, IAM, CI/CD, and production support for telecom and banking domains.

EXPERIENCE

Tech Lead

Tech Mahindra

05/2022 - 08/2025 Bangalore, India

- Led cross-functional teams in designing and deploying advanced technology solutions
- Engineered secure authentication frameworks using SAML and OAuth
- Optimized system response times by **30%** by identifying and resolving performance bottlenecks in Spring Boot microservices
- Conducted thorough code reviews to enhance software quality
- Spearheaded the development and maintenance of EPOS, a microservices-based telecom application
- Managed critical production defect resolution with 95%+ adherence to SLA/KPA timelines

Lead Analyst

CGI

02/2020 - 04/2022 Bangalore, India

- Managed cross-functional teams to deliver complex projects
- Designed and implemented high-performance applications using Spring Boot and Core Java
- Enhanced system reliability and efficiency through performance analysis
- Developed and maintained secure RESTful web services with OAuth and SAML
- Reviewed code and enforced development standards

Senior Associate

Cognizant

03/2019 - 12/2019 Bangalore, India

- Engineered scalable investment banking solutions by designing and developing a full-stack application using Spring MVC, Hibernate, and JavaScript, enhancing system efficiency and performance for a global client.
- Applied best coding practices with JPA, Maven, and Apache Tomcat; strengthened security with Log4j and SLF4J; and ensured reliability through rigorous JUnit4 testing.
- Managed critical production defect resolution, achieving 95%+ adherence to SLA/KPA timelines, minimizing system downtime, and ensuring business continuity.

Software Engineer

Manam InfoTech Pvt. Ltd

10/2012 - 03/2019 Bangalore, India

- Spearheaded the design, development, and deployment of Mobee Bank and Nat625 Admin.
- Improved application efficiency and reduced response latency by optimizing Hibernate ORM mappings and implementing secure authentication using Spring Security.
- Coordinated cross-functional teams for timely delivery and effective collaboration.
- Designed scalable microservices-based architectures.
- Maintained high coding standards with JUnit testing and CI/CD pipelines.

CERTIFICATIONS

Oracle Certified Professional Java SE 6 Programmer

Oracle Certified Associate Java SE 8 Programmer

Google x Kaggle – AI Agents Intensive Capstone

Certified in building an end-to-end AI agent system using Python and related technologies

KEY ACHIEVEMENTS

★ SSO & Identity Migration – Telefonica Dealer Platform

Played a key role in migrating legacy authentication to a centralized SSO solution using OAuth 2.0 and SAML 2.0, integrated with Azure AD and Citrix, supporting secure IAM integration and large-scale adoption by Telefonica dealers.

🔧 Production Stability & Performance Excellence

Successfully handled high-priority production issues and performance bottlenecks in a large-scale microservices environment, consistently achieving 95%+ SLA adherence for critical dealer-facing applications.

SKILLS

Languages:

Java, Kotlin, Python

Frameworks:

Spring Boot, Spring MVC, Hibernate, JPA

Architecture:

Microservices, REST APIs

Messaging & Cache:

Kafka, Redis

Security & IAM:

OAuth 2.0, SAML 2.0, Azure AD, Spring Security

Databases:

SQL, MongoDB

DevOps & Cloud:

Docker, Kubernetes, CI/CD

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Jawaharlal Nehru Technological University

📅 08/2008 - 05/2012

SKILLS

Build & Servers:

Maven, Gradle, Apache Tomcat, JBoss

PROJECTS

EPOS

- Developed and maintained EPOS, a microservices-based telecom application

CC360

- Developed the CC360 Healthcare application

MobeeBank Implementation

- Led the MobeeBank Implementation project for the Banking & Finance domain

AI Agents Capstone – Google x Kaggle

Capstone project focusing on AI agents and real-world workflows

- Built an end-to-end AI agent system using Python and Gemini
- Designed autonomous agents to collaborate, reason, and use external tools
