

RUBI SINGH

Associate Software Engineer II at Capgemini

📞 8357029133 @errubisingh01011998@gmail.com 🔗 <https://www.linkedin.com/in/rubi-singh-288173190>

📍 Bangalore

RS

CAREER OBJECTIVE

To obtain a responsible and challenging Software Engineer's position where my education and work experience will have valuable application and to develop and deliver the Applications/ embedded systems/products/ modules which will create value to every stakeholder who have invested in.

EDUCATION

BE(Bachelor of Engineering)

Rajiv Gandhi Prodyogiki Vishwavidyalaya bhopal (M.P)

📅 2015 - 2019 📍 Bhopal(M.P)

CGPA
7.3 / 10.0

EXPERIENCE

MIC (Maternal Infant Care)

GE HealthCare

📅 2022 - Present 📍 Bangalore India

Enabling the human side of healthcare

Responsibilities:

- Working on Medical devices such as incubator, warmer, Ultrasound, Monitor, printer as an embedded engineer.
- Hands on experience on python, C, C++, Unit Testing, Cppunit testing.
- Collaborated with team, used Python scripts to create simulator (internal tool) to monitor all details of active cable (IUPC, ULS, FECG, NIM, TOCO).
- Implemented the Bluetooth feature in product by using C.
- Having experience on Bluetooth interface which is developed by using C.
- Used python scripts to create GUI to communicate with printer and send the serial number and all command by using serial cable.
- Developing the python script to test the DDS requirement.
- Fixing the bugs which is raised by verification team.
- Writing the unit test cases for embedded C production code.
- Understanding of embedded system.
- Having experience on working with hardware.
- Work closely with external teams for hardware or electrical issues. Take the ownership of modules and closely monitoring the issues.
- Testing the product functionality and features.
- **Learning:** Understanding the embedded system, error handling and how the real time using the tools.
- **Tools and Development Environments:-**
- **Tools:** Visual Studio, IAR workbench, Keil, Pycharm, J-trash etc.

KEY ACHIEVEMENTS

- 💎 **Project Efficiency Boost**
Increased project efficiency by 30% through optimized Python scripts.
- 💎 **Operational Error Reduction**
Developed GUI reducing operation errors by 25%.
- 💎 **Bug Resolution Success**
Resolved 95% of software bugs within one month.
- 💎 **Device Performance Monitoring**
Monitored 100% of device performance using Grafana tools.

SKILLS

Programming

C	C++	python	Basic Java
unit testing	HTML5	CSS3	
Basic Javascript	Django Framwork		
Bootstarp	MySQL Database		
Web Development			
STM 32 micro controller			

Development Tools and IDE's

Git Lab/Git	Collabrator	Rally	ALM
Visual Studio	IAR workbench	Keil	
Atom	Eclipse	PyCharm	
mobaxterm	realterm	Putty	
WinScp			

STRENGTHS

- 🕒 **Time management**
Prioritizes essential tasks so they are not rushed. Sets deadlines that ensure reaching milestones on time.

EXPERIENCE

System Performance Analysis

GE HealthCare

2022 - 09/2022 Bangalore India

Enabling the human side of healthcare

Responsibilities:

- As I was the part of GEHC healthcare and I was working in MIC project, so live system performance needs to be monitored to control the quality of the devices (Incubator and Aria device).
- The use of software performance analysis is, performance of software items (CPU utilization, Memory Utilization, process, , Load etc.) need to monitored to control the quality of the product.
- Have experience in new tools and learnt about the tools and apply in real time production to control the quality of product.
- With the help of Grafana and graphite-web we are able to monitor the performance of the ARIA device (incubator) in graph way.
- **Learning** : Understanding on new tools such as Grafana, graphite-web, collected,. and learnt to setup all tools in Linux environments
- **Tools and Development Environments:-**
- **Tools:-** Grafana , graphite-web, collected. linux operating system.

STRENGTHS

Adaptability

I remember that change is not personal and is inevitable. I break my projects into multiple parts so that if something goes wrong, I can quickly fix it.

Accountability

I take ownership of my mistakes. By doing that I learn what I did wrong so that it does not happen again.

CERTIFICATION

[Python specialization course from Coursera](#)

[Java specialization course from Coursera](#)

[Shell scripting course from Coursera](#)

[C++ oops concepts course from Coursera](#)

[Embedded System from Coursera](#)

PASSIONS

I love turning ideas into functional prototypes, whether it's an automated home system or a robotic arm powered by embedded controllers.

Travelling and exploring the world and nature.
