PROFILE SUMMARY

- Experienced Embedded Automotive Software Developer with over **2.10** Years in Powertrain Systems and Battery Management Systems (BMS). Proficient in SDLC (V-Lifecycle), requirements analysis, design, coding, testing, and integration. Skilled with Embedded C, MATLAB Simulink, ETAS-ASCET, INCA, and TPT, adhering to ASPICE, MISRA, and MAAB standards. Strong problem-solving and communication skills. Recognized for high-quality results and effective multi-tasking. Committed to continuous improvement in automotive software development.

SKILLS

Programming Language	C, Embedded C
Code Generation Tools	MATLAB Simulink, ASCET
Development Standards	Automotive SPICE (ASPICE), MISRA, MAAB, V-Model SDLC
Software Development & Process Tools	Visual Studio, Git, ECU. Worx
Testing Tools	INCA, MDA, UT, TPT Testing
Requirement Engineering & Tracking Tools	IBM Rational DOORS, IBM ClearQuest and Request One
Embedded Protocols	Basic knowledge on I2C, SPI, CAN

EXPERIENCE

Embedded Automotive Software Developer

Oct 2021 - Present

Payroll Company :

Capgemini Engineering, Bengaluru

Dedicated Client Company Name :

Bosch Global Software Technologies, Bengaluru

- Developed and Integrated Embedded Software for **Powertrain** and **Battery Management Systems (BMS)**.
- Led **Requirements Gathering, Functional Specification, and Technical Documentation**.
- Executed all **SDLC phases(V-Model)**, including **Design, Coding, Testing, and Integration**.
- Utilized **Embedded C, MATLAB Simulink, ETAS- ASCET** : adhering **ASPICE , MISRA standards, MAAB Standards**.
- Conducted Code Peer **Reviews, Unit Testing** and **Debugging** : ensuring compliance, quality and effective multi-tasking.
- Collaborated with cross-functional teams, driving project success and innovation.

EDUCATION

B.Tech in (Electrical Engineering), Centurion University Of Technology and Management

2017 - 2021

Higher Secondary Education(12th), Talent's College of Sci&Tech

2015 - 2017

ACTIVITIES, AWARDS AND RECOGNITION

- Best Performer Achievement in Q3 in Team Automotive by client Bosch (2022) .
- Best Project Achiever Award in Q2-Q3 in SDE by Capgemini Engineering (2023) .
- Student Campus Ambassador for Internshala under (ISP 9.0).
- Winner in Inter-College level World Skill (2020)

PROJECTS

- **Autonomous Fire Detecting and Extinguishing Robot.** "Arduino Based Robot for automatic sensing Fire and extinguishing."
- **Temperature sensing, alerting predicting by Cloud Pi system.** "Here I used Raspberry pi-3, DHT11 sensor for Temperature sense predict and also Automated data storing in Cloud Platform."
- **Time Series Analysis and Forecasting Temperature of Next Year.** "The main offering of the project is Time series analysis with ARIMA SYSTEM which is giving better-predicted results with less error and high precision."
