Profiles

Critical thinking DevOps Engineer with extensive understanding of high availability architecture and concepts. Purpose-driven professional with capacity to be strong team player plus work effectively independently.

Technical Skills

Category	Skills
Programming Languages	Python, SQL
Data Analysis and Visualization	Tableau, PowerBI
Machine Learning	Supervised Learning, Unsupervised Learning
Enterprise Resource Planning (ERP)	SAP:MM (Materials Management)
Cloud Platforms	Azure, AWS
Continuous Integration/Continuous Deployment (CI/CD)	Azure DevOps, Gitlab, Jenkins, YAML (for defining CI/CD pipelines)
Containerization	Docker
Container Orchestration	Kubernetes
Infrastructure as Code (IaC)	A.R.M Templates (Azure Resource Manager), Terraform
Data Management and Integration	Azure Data Factory, SAP Data Intelligence (DI), SAP HANA
O.S.and Platforms	Power Platform, Linux, Windows
Scripting and Automation	PowerShell
Access Management	Identity and Access Management (I.A.M)
Database Connectivity	J.D.B.C Driver
Package Management	N.P.M (Node Package Manager)

Work History

2023-01 –
2024-03

DevOps Engineer

Invenics Services, Kochi, India

1)Power Platform ALM & orchestration in Gitlab

Contribution & Responsibilities:

- Implemented seamless integration between Power Platform and GitLab, facilitating effortless migration of managed and unmanaged solutions across environments in response to client requirements. This streamlined workflow significantly improved collaboration and efficiency in solution deployment.

Toolset: GitLab, Docker, GitLab container registry, GitLab CI/CD, PowerApps CLI

2)Power Platform ALM & Orchestration in Azure Devops:

Contribution & Responsibilities:

- Implemented robust integration between Power Platform and Azure Repos, enabling effortless migration of solutions across diverse environments.
- Streamlined application release management processes for Power Platform applications, ensuring smooth and efficient deployment.

Toolset: Azure DevOps, Power Platform, PowerShell cmdlets

3)UiPath Automation and Orchestrator Deployment:

Contribution & Responsibilities:

- Packaged and deployed UiPath solutions with Azure DevOps
- pipelines with streamlined configuration management to UiPath
- Cloud hosted on AWS.
- Dynamically generated UiPath robots were deployed into Orchestrator.

Toolset: Azure DevOps, UiPath, PowerShell

4)SAP Hana Code Management:

Contribution & Responsibilities:

- Configured SAP Hana on BTP to allow Azure DevOps pipelines to connect to Hana via Flyway CLI, utilizing the JDBC driver of SAP Hana Cloud.
- Set up Azure CI/CD pipelines with Hana hostname, username, and password parameters for Flyway command-line integration.
- Installed Flyway into CI/CD agents to facilitate seamless execution of migration tasks.
- Defined and managed SQL scripts in Azure Repos, ensuring proper versioning and organization.
- Orchestrated the migration process, ensuring that SQL scripts are migrated to SAP Hana in a controlled and version-controlled manner.
- Provided ongoing support and troubleshooting for SAP Hana configuration and Flyway integration within the CI/CD pipeline.
- Collaborated with cross-functional teams to establish best practices for SAP Hana code management and version control.

Toolset: SAP Business Technology Platform (BTP), Azure DevOps, Flyway CLI, SAP Hana, Azure Repos, Azure CI/CD Pipeline, JDBC Driver (SAP Hana Cloud)

5)Azure Data Factory Workflow Optimization:

Contribution & Responsibilities:

- Optimized data workflows and ensured data pipeline reliability in Azure Data Factory.
- Deployed Azure Data Factory pipelines across environments, demonstrating expertise in seamless pipeline migration.

Toolset: Azure repos, Azure CI/Cd pipeline, A.R.M Templates, NPM, Azure Resource Manager, ADF plugin and cmdlets.

6)Fabric Distributed Systems Stability and Deployment:

Contribution & Responsibilities:

- Implemented version control in Fabric, contributing to the stability and scalability of distributed systems.
- Orchestrated seamless deployment of Fabric components from one environment to another, ensuring consistency and reliability.

Toolset: Azure Fabric, Azure DevOps pipelines, Azure fabric plugins.

7)CMake Build Automation for Libgit2:

Contribution & Responsibilities:

- Utilized CMake for configuring and building the libgit2 library, ensuring cross-platform compatibility and streamlined deployment.
- Managed the installation of required DLLs and libs, and configured the environment for seamless integration with Cygwin.

Toolset: CMake, Visual Studio 2019, Cygwin

8)VPC (Virtual Private Cloud) Configuration and Management

Contribution & Responsibilities:

- Designed and implemented Virtual Private Cloud (VPC) infrastructure for secure and scalable cloud environments.
- Configured subnets, route tables, and security groups to ensure optimal network traffic flow and access control.
- Managed VPC peering, VPN, and Direct Connect for seamless connectivity between cloud environments and on-premise systems.
- Conducted performance monitoring, troubleshooting, and optimization of VPC resources to ensure high availability and low latency.

Toolset: AWS VPC, Route 53, Security Groups, VPN, Direct Connect, Terraform

2022-07 -
2022-12

Data Engineer

Invenics Services Pvt Ltd, Kochi, India

1) Project: End-to-End Data Pipeline Implementation with Audit Logging in SAP Data Intelligence (DI)

Contribution & Responsibilities:

- Developed a SAP Data Intelligence (DI) pipeline to efficiently onboard data from Data feed to staging area.

- Conducted rigorous data quality checks using stored procedures to uphold data integrity throughout the pipeline.
- Seamlessly integrated the pipeline to ingest validated data into SAP HANA, facilitating further analysis.
- Implemented a robust audit log system to meticulously track pipeline execution status and ensure transparency.
- Automated email notifications were deployed via SMTP server to promptly alert developers in case of pipeline failures, ensuring timely resolution.

Toolset: SAP DI SAP HANA

2)Project: Rule-Based Data Profiling and Transformation with SAP Data

Intelligence- Metadata Explorer:

Contribution & Responsibilities:

- Leveraged SAP Data Intelligence Metadata Explorer to perform in-depth profiling of heterogeneous datasets including CSV files, tables in HANA, and Excel spreadsheets.
- Collaborated with the client to create a comprehensive rulebook based on regex patterns tailored to their specific requirements.
- Implemented rule-based transformations within SAP DI Metadata Explorer, applying the rulebook to data across various formats.
- Orchestrated complex data transformations, including inner joins on tables as per client specifications, ensuring data consistency and alignment with business needs.

Toolset: Metadata Explorer, Rulebook, Rules in SAP DI

3) Project: Automated Weather Data Retrieval Pipeline with SAP Data Intelligence

Contribution & Responsibilities:

- Designed and implemented a scheduled data pipeline within SAP Data Intelligence (DI) to retrieve daily weather information.
- Leveraged API requests to fetch weather data consistently over the course of a month.
- Ensured seamless integration with SAP DI, enabling efficient data extraction and processing.
- Facilitated timely access to accurate weather insights, enhancing decision-making processes for various applications and industries.

Toolset: Modeler, Scheduler in SAP DI

4)Project: Dynamic Excel to CSV Conversion Automation in SAP Data Intelligence

Contribution & Responsibilities:

- Engineered a Python script within SAP Data Intelligence (DI) to automate the conversion of Excel workbooks to CSV format.
- Implemented dynamic functionality to generate separate CSV files for each sheet within the Excel workbook.
- Ensured flexibility and scalability by dynamically storing the output CSV files.

- Streamlined data processing workflows by eliminating manual conversion tasks, enhancing efficiency and productivity within the SAP DI environment.

Toolset: SAP DI ,python 3.8

2011-01 -
2011-10

Management Trainee

TDK-Epcos

- Continuous Improvement of product portfolio, Supplier Quality Assurance, Optimizing Standard operating procedures, reducing wastage of materials, Vendor Management, Implemented six Sigma at TDK-Epcos which was under review of K.P.M.G

Education

2022-01

Certified specialist in Data Science Analytics

ICT Academy of Kerala - Technopark, Kerala

Percentage: 86

2011-01

Post Graduate Diploma in Manufacturing Management

Symbiosis Institute of Operations Management - Nashik

Percentage: 2.467 C.G.P.A out of 4

2009-01

BTech-Mechanical Engineering

SaintGits college of Engineering - Kerala

Percentage: 58

2004-01

12th

St.Gregorious Senior Secondary School - Kerala

Percentage: C.B.S.E 65

2002-01

10th

O.E.M Public school - Kerala

Percentage: C.B.S.E 63
