

SATWIK REDDY

AZURE DATA ENGINEER

Data Engineer with 2 plus years of experience in data engineering and visualization. Proficient in Azure Databricks, Pyspark ,SQL, Azure Data Factory and Azure DevOps for designing and implementing data solutions. Skilled in creating visually appealing Power BI dashboards, emphasizing data modelling, transformation, and stakeholder collaboration. Proven track record delivering business intelligence solutions for data-driven decision-making and business growth.

WORK EXPERIENCE

Cognizant

Associate

Sep 2021 – Nov 2023

- Developed **AZURE DATAFACTORY** pipelines, automating data flow across diverse sources, optimizing the efficiency and productivity
- Utilized **AZURE DATABRICKS** for data wrangling, cleaning, and transformation to enhance the data Processing.
- Utilized **AZURE DEVOPS** to deploy the code for multiple environments and set up CI/CD pipelines for various components.
- Utilized **AZURE DATA LAKE STORAGE** and **AZURE BLOB** for accessing the files via Mount Points
- Demonstrated **MySQL** expertise, adeptly crafting diverse SQL queries for comprehensive database management, optimization, ensuring data accuracy and consistency.
- Generated ad hoc reports based on management requests to support data-driven decision-making.
- Utilized **JIRA** for tracking work progress, analyzing requirements, and providing development estimates.
- Collaborating with cross-functional teams, coordinating tasks, and ensuring seamless workflow to meet project milestones and deliverables effectively.
- Developed and managed interactive **Power BI** dashboards to visualize key performance indicators, enabling data-driven decision making and enhancing business insights
- Served as an ETL Tester, ensuring data quality through functional and integration testing
- Conducted repeated cross-validation of data to enhance accuracy and reliability in analysis
- Conducted comprehensive testing of interactive BI tool components, verifying functionality of filters, drill-downs, and internal links to ensure optimal user navigation and data exploration.
- Ensured alignment of report data with source systems by rigorously validating calculations and verifying the accuracy of aggregations

TECHNICAL PROFICIENCY

- **Programming Languages:** SQL ,Python ,PySpark
- **Data Warehousing & ETL:** Azure Data Factory, Azure Data Bricks
- **Cloud Services :** Azure Blob, Azure Data Lake Storage Gen2,Azure Devops
- **Data Visualization Tools:** Power BI
- **Database Management Systems:** MySQL , SQuirreL SQL
- **Microsoft Tools :** Excel, Word, Powerpoint
- **Project Management :** JIRA

CORE COMPETENCIES

- Data Analysis
- Data Visualization
- Business Intelligence
- Big Data Analytics
- Data Engineering
- Data Ingestion
- Data Integration
- Azure DevOps CI-CD
- Analytical
- Collaborator
- Innovator
- Leadership
- Communicator
- Decision-making

CERTIFICATIONS

- **DP-203** : Azure Data Engineer
- **PL-300** : Power BI Data Analyst
- **AZ-900** : Azure Fundamentals
- **AI-900** : Azure AI Fundamentals

EDUCATION

B.Tech in Mechanical
Engineering- CGPA(8.22)
CVR College of Engineering
Hyderabad
