

SUMMARY

6+ years experienced, meticulous & result-oriented Senior Data Scientist armed with a proven track record of analytical acumen in deploying complex machine learning and statistical modeling algorithms/techniques for identifying patterns and extracting valuable insights. Possesses diverse experience in planning & executing multiple projects and liaising with the key stakeholders to identify & resolve business problem statement and deliver excellent results.

KEY SKILLS

1. Machine Learning Techniques
2. Cloud : AWS , Azure, GCP
3. Big Data
4. Optimization Techniques
5. Data Mining & Analytics
6. Predictive & Statistical Modeling
7. Sentiment Analysis
8. Data Visualization : Power BI, Tableau
9. ETL
10. Process Automation
11. Team Management
12. Stakeholder Management
13. EDA
14. NLP
15. Debugging
16. Text Mining
17. Process Improvement
18. Team Coordination
19. MLOps
20. Model Deployment
21. Databricks
22. Kubernetes
23. Docker
24. Deep Learning (DL)
25. GenAI, LLM, SFT, RLHF
26. CI/CD, MLFlow, Azure ML, GIT
27. Model Deployment, FastAPI

TECHNICAL SKILLS

Languages: Python, R, PySpark
Big Data Ecosystem : Spark
Database Language : Advanced SQL
Cloud Computing: AWS, EC2, EMR, S3 ,
AZURE, GCP

PROFESSIONAL EXPERIENCE

Lead Data Scientist

Feb '24 - Nov '24

Datamatics Global Limited

Gurugram, IN

- Working as a key person in the team leading AI/ML initiatives across different APAC, NAM & LATAM markets in market research, transportation & retail industry.
- Involved in implementing end to end AI solution by predicting dynamic price of a quote for a renowned logistics customer in US.
- Involved in developing and deploying end to end solution for a UAE based government organization by predicting the customer affinity, churn and CLTV and deployed them in their AWS workstream.
- Designed end to end dynamic pricing model for every shipment of a LTL organization for every live quote of a customer for every shipment.
- Responsible for designing marketing campaigns in research area to target more customers, campaign effect, ad effect and measurement science.
- Responsible in automating dashboarding workflow for every marketing campaign in power bi workspace in azure environment.
- Leading a team of 7 odd members comprising of data scientists and data analyst.
- Also worked on an internal POC project to decrease the employee attrition and an automated hrms tool to track the employee lifecycle.
- Created a simulator tool using dash in python, ml, machine learning that will give dynamic price for different shipments in a logistics company.

Senior Data Scientist

Jun '21 - Sep '23

Dunnhumby

Gurugram, IN

Worlds First Customer Data Science Platform

- Acting as the key person for handling all the retail analytics and customer analytics solution for NAM markets mainly SEG & Tesco.
- Responsible for delivery of insights/targeting recommendations for the CPGs and brands across North America.
- Responsible for preparing insights and ML Model for personalized targeting followed my campaign measurement.
- Complete ownership of retailer project and working closely with Key Stakeholders- Client Lead, Media director of retail chain and analyst team.
- Responsible for predicting churn rates and uplift for measuring campaign performance. Identifying the loyal customers and developing LCM targeting program.
- Complete ownership of retailers project which includes client management, project management and coming up with ideas to improve effectiveness.
- Responsible for handling all sort of customer targeting for campaigns followed by evaluating the performance of the campaign.
- Automated evaluation one pager for generating evaluation reports in PDF through VBA and PowerBI. Responsible for identifying churn rates of customers with a particular CPG which ran throughout a fiscal year.
- Worked on sentiment analysis model(binary and multiclass) for more enhanced customer targeting using NLP.
- Created medical product recommendation system based on voice transcript data for a healthcare client.
- Responsible for leading a team of 5 members out of 15 members which comprises of junior data scientist, associate data scientists and applied data scientists and few interns working closely with our client in media proposition for SEG.

Visualization: Tableau, PowerBI, VBA.
Database: MySQL, MongoDB, RDBMS, Redshift, ORACLE
Statistics/ML: Linear/Logistic Regression, Ensemble Trees, Gradient Boosted trees, Random Forest, SVM, Supervised(Regression, Classification), Unsupervised(Clustering, Association), DL, Computer Vision, OCR, LLM, GenAI, FastAPI

CERTIFICATIONS

- Advanced Analytics & Predictive Modeling | 365 Data Science
- Math behind ML | AWS|
- Statistics for Data Science Coursera
- Microsoft Certified Data Scientist
- Certified Business Analytics professional | IVY Professional School| June '20
- Machine Learning & CLOUD IIT-Madras

- Mentoring young aspiring data scientists who joined as a fresh graduates so that we can align them to the proper work stream.

Senior Applied Scientist

Oct '20 - Jun '21
Bengaluru, IN

AMAZON Inc.

- Working with the DEX IN core team and is responsible for identifying key metrics.
- Responsible for pulling data from amazon redshift data warehouse by querying through SQL.
- Deployed ML Algorithms like Random Forest, SVM, Logistic regression for customer targeting.
- Gained experience in Big Data Hadoop framework by migrating solutions to PySpark.
- ML Model monitoring and improving the model performance. Responsible for making visual dashboards using Pwer Bi & Tableau for understanding the key metrics in a much more lucid fashion and business insights generation.
- Leveraging NLP text classification over document processing and sentiment analysis of amazon user reviews.
- Working with the delivery experience India team for developing key business metrics and ensuring hassle free customer delivery experience.
- Worked on churn prediction to find the retention rate of the customers using logistic regression(ML) Identified customer segmentation based on product categories using clustering(ML) technique for better customer targeting.
- Used apriori algorithm(ML) to find the frequent product bought together for amazon website to target customers.
- Found uplift sales using OLS regression technique. (ML)

Data Scientist

Nov '17 - Jun '19
Bengaluru, IN

S.P. Enterprise Pvt Ltd

- Day to day report generation of Meter Replacement, Meter Shifted, Meter Installation.
- Visual Dashboarding in Excel for insight generation to increase more profitability & productivity and data extraction to analyze monthly profit scale.
- Used statistical tools like R/Python for statistical modeling using ML algorithms for understanding the business metrics.
- Trained and developed ML model for customer churn behavior for introducing Loyalty Program
- Involves in collecting and filtering sample documents required for model training and performance evaluation. Machine Learning.

EDUCATION

Master of Science(M.S)

Dec '21 - Jul '24
Bengaluru, IN

Liverpool John Moores University(LJMU)

Passed with Distinction

- Machine Learning & Artificial Intelligence
- Accomplished: 95%

Advanced Post Graduation

Dec '21 - Dec '22
Chennai, IN

Indian Institute of Technology, IIT-Madras

- Machine Learning & Cloud
- Secured : 93%

Master Certification in ML & Business Analytics

Jun '19 - Nov '20
Kolkata, IN

IVY Professional School

- Completed 1 year full time program, private
- Business Analytics & Machine Learning
- Achieved : 90%

Bachelor of Engineering

Aug '13 - Nov '17
Kolkata, IN

Maulana Abul Kalam Azad University ofTechnology(MAKAUT)

- Electronics & Communication Engineering
- Concluded: 84%
