PROFILE

Passionate AI ML Enthusiast. Always looking forward to learn, build and deploy new AI and ML models, with a focus on solving problems and delivering impactful solutions.
Currently looking for an opportunity to demonstrate my skills as AI/ML Engineer.

PROJECTS

PDFTalker (GenAI)

Chat with Multiple PDFs (Still working)

TechStack:

Google Gemini, Langchain, Gradio, FAISS, PyPDF, Python

Learning:

- FineTuning the model and RAG.
- Learned Embedding the PDF text and User Query and storing the embedded data in vectors.
- Text extraction from PDF and pre-processing it. using PyPDF
- Used Gradio Python library Web Framework.
- Build Session wise chat history using Python Dict.

Conversation Translation (NLP Project)

Translating the Conversation from Hindi to English

TechStack:

- Python lib.(googletrans, Pandas, transformers, Torch, spacy, scikit-learn, joblib, time)
- Machine Learning Multinomial Navie Bayes, Random Forest classifier , Logistic Regression.
- NLP Models: BART, Sentiment-analysis pipeline
- File Handling CSV & TXT file.

Learning:

- Learnt how to translate txt using googletrans
- Learnt how to use pre-trained NLP models for summarization by processing text chunking and summarization.
- How to extract names entities. using SpaCy.
- Learn how to vectorize text data using TF-IDF.
- Gained knowledge on using sentiment analysis models.

FoodChatBot (NLP Project)

Take online order generate order id and gives order status.

TechStack:

- Google Dialogflow for Chatbot frontend
- MySQL
- Python lib. py,mysql
- WebFramework- FastAPI
- Ngrok to convert http to HTTPS

Learning:

- Designed Database using SQL.
- http >>> https

- FastAPI for developing backend connections.
- Learnt playwith Dialogflow

Forecast Cab Booking [↗](#)

Develop a model that can forecast cab booking demand in a city

TechStack: Python

- Data Manipulation and Analysis: Pandas, Numpy, Datetime
- Visulations:Matplotlob, seaborn
- ML: sklearn

Learning:

- Learnt data manupilation and filtering.
- feature engineering.
- removing outliers
- converted categorical data into one hot vectore
- trained models finding the best model
- hypparameter tuning on the best model using GrisSearchCV

Custom Model for Object Detection (DL Project) [↗](#)

Using Yolov4 and custom weights to train the model to predict Squirrel images.

TechStack: Python

- OpenCV
- Darknet
- Yolov4
- CUDA
- Python Lib. Matplotlib, Random, OS

Learnings:

- Object Detection - Squirrel
- Converting annotations (labelling data) to yolo format.
- Image processing.
- Even learnt detecting objects in video and images.

PROFESSIONAL EXPERIENCE

AI Researcher - IAN

10/2023

Freelancer

EDUCATION

Generative AI Intensive (Gen AI)

2024

Google + Kaggle

India

PG Diploma: Masters in Artificial Intelligence and Machine Learning

2022 – 2023

National Institute of Technology, Warangal (Edureka)

India

Bachelor of Management Studies Finance

2015 – 2018

Lala Lajpat Rai College of Commerce and Economics

Mumbai, India

AWARDS

Kaggle Badges

Google + Kaggle

Awarded in GenAI Course

Overall Achiever of the College

Lala Lajpatrai College

Awarded in the Final Year

INTERESTS

- Swimming, Reading, Playing PC-Games, Walking
