

SMRUTI RANJAN PANDA

SOFTWARE DEVELOPER

PROFILE

Robotics Process Automation (RPA) Specialist with **4.7 years** of hands-on experience, including 3.7 years in **UiPath** and 1 year in **Power Automate Desktop** and **AKABot**. Proven expertise across all phases of the Robot Development Life Cycle (RDLC), encompassing process identification, automation feasibility analysis, and end-to-end development and deployment. Adept at crafting comprehensive Business Requirement Documents (BRD) and Solution Design Documents (SDD), ensuring solutions align with organizational goals. Highly skilled in designing, coding, testing, debugging, and implementing efficient automation workflows for Excel, Windows, web-based, and Java applications. Demonstrates an in-depth understanding of exception handling best practices to maintain robust and error-free processes. Committed to delivering high-impact automation solutions that drive productivity and reduce operational overhead, with a strong focus on process optimization and seamless integration into existing business workflows.

ORGANIZATION S

• Radamatic Solutions	AUG 2024 - OCT 2024
• UST Global	AUG 2023 - JUN 2024
• FPT Software	MAY 2022 - JUN 2023
• FirstSource Solution Limited	JAN 2020 - MAY 2022

EXPERIENCE

• UST Global Software Developer III	AUG 2023 - JUN 2024
• Highmark HealthCare: Automated an insurance process with 52 scenarios, managing claim ID uploads and approvals/submissions using dispatcher and performer bots. Generated and shared reports with business teams. Technologies: UiPath, Excel, Outlook. • Amori Health-Care: Developed dispatcher and performer bots for patient report handling. Uploaded invoices and profile screenshots to Azure Blob for seamless healthcare data management. Technologies: UiPath, Azure Blob, Orchestrator. • Citi Bank: Automated report download and client email distribution. Developed error-handling for unavailable applications, ensuring consistent report delivery. Technologies: Power Automate Desktop, Outlook. • PNC BANK - DIA: Automated VM-to-local report transfer and email updates. Utilized UiPath with Computer Vision for smooth file handling and client communication. Technologies: UiPath, Orchestrator, Outlook. • JP Morgan Chase Bank - NSDI: Automated report retrieval for 12 clients, with email alerts for any missing reports. Technologies: Power Automate Desktop, UiPath, Excel. • BANK of America - TCIS: Developed a daily automation for client invoice downloads and email notifications within a 30-day rolling date range. Technologies: Power Automate Desktop, Outlook.
