SUMMARY

Results-oriented Software Engineer with 2.7+ years of experience building scalable and high-performance web applications. With Expertise in both frontend and backend development delivered end-to-end 6+ apps, which has 1M+ LIVE users across apps

SKILLS

HTML, CSS, SASS, JavaScript, TypeScript, ReactJS, NextJS, React / Jest Unit Testing, Redux , Zustand, NodeJS, MongoDB , ExpressJS, Python,Git, Storybook, GraphQL, Java, Prisma, PostgreSQL, Tailwind CSS, ShadCN

EXPERIENCE

Frontend Engineer | InMobi | Remote

<https://glance.com>

- Developed robust and reusable UI components with Storybook and wrote unit tests to maintain consistency.
- Built frontend for a live-streaming platform supporting Unicast, Multicast, and Tricast protocols.
- Utilized Canvas to render emoji animations with a refresh rate of 60 FPS and an average load time of 8.3ms.
- Delivered a seamless QR-code-based interaction system between TV and mobile devices.
- Optimized comments box by reducing comments flowing in at particular time to reduce storage load.

Fullstack Engineer | Keywordly | Remote

<https://keywordly.ai>

- Architected and developed the platform's frontend and backend with **TypeScript** and NextJS.
- Implemented Dashboards , complex data visualizations, including tree and radial tree graphs, for actionable insights.
- Built robust **state management** and interceptors for handling user sessions, authentication, credits and subscription management.
- Integrated AI-powered content generation and prompt suggestion systems using **OpenAI APIs**.
- Implemented complex tables + sorting + filtering + searching capabilities.

Frontend Engineer | Story | Remote

<https://story.com>

- Built a modular frontend architecture from scratch using **NextJS** and **TypeScript** to ensure scalability.
- Integrated **web sockets** to provide real-time feedback and updates for user interactions.
- Developed an AI-powered story generation tool and a video editing feature for enhanced storytelling.
- Implemented state management for seamless data flow and user experience.
- Optimized the platform for **SEO** and **technical SEO**, significantly improving search engine rankings.

Fullstack Engineer | Koba Education | Remote

https://youtu.be/s_IwDw_dPMU

- Led the frontend and backend development using **NextJS**, **TypeScript**, and **NodeJS**, achieving a 40% reduction in load times.
- Designed scalable **state management** with Context API and implemented a modular component architecture.
- Developed backend architecture using NodeJS, Digital Ocean for efficient AI integrations.
- Implemented dashboards for different persona.
- Implemented Onboarding module and role based access.
- Pioneered a detailed error reporting mechanism for effective debugging.

Frontend Engineer | WIN Home Inspection | Remote

<https://wini.com>

- Reduced application load times from 14s to 1.09s (~92%) using advanced performance optimizations.
 - Developed an Inspection Booking Engine and implemented a Python-based search algorithm for nearest inspectors.
 - Developed scalable components for Frontend part of application & Increased organic search visibility by 46.76%.
-

EDUCATION

BSc. Statistics Hons. | University of Delhi | Delhi | 2019
