Professional Overview

- Systems Engineer with 2+ years of experience in designing, implementing and developing robotic automation solutions to streamline business processes. Typically possess a combination of programming skills, domain knowledge, and an understanding of business processes.
- As software Development engineer, I you would play a pivotal role in designing, developing, and maintaining innovative software solutions to meet the needs of our clients and stakeholders. My expertise in Python programming, C, MYSQL, C#. Aligns perfectly with the requirements of this position.

Professional Experience

Infosys Limited (<https://www.infosys.com>)

01/2022 - 01/2024

Project: Molina Healthcare solution.

Claims Processing Automation.

- Developed and deployed a comprehensive RPA solution for automating claims processing, including data extraction, validation, and entry into the financial system.
- Achieved a 40% reduction in processing time and a 30% decrease in manual errors through effective automation and process optimization.

Responsibilities:

- Designed and developed multiple bots using UI Path Studio for automating web, Citrix, and Windows applications, improving process efficiency and reducing manual intervention by 40%.
- Managed incidents and provided timely resolutions for automation issues. Led change management efforts to update and optimize bots, ensuring minimal disruption and high-quality performance.
- Acted as a subject matter expert (SME) for UI Path, providing guidance and support to the bank's team on bot development and troubleshooting. Assisted in aligning automation strategies with business needs.
- Conducted thorough testing of bots to ensure functionality and performance. Successfully deployed bots into production environments, following best practices to ensure smooth integration and operation.
- Addressed and resolved bugs and issues encountered during the bot development and deployment phases. Applied strong problem-solving skills to troubleshoot and optimize bot performance.
- Worked within an agile framework, adapting to changing requirements and priorities. Participated in sprint planning and review meetings to ensure alignment with project goals and timelines.
- Identified and developed automation solutions for key process steps, leading to significant improvements in operational efficiency and accuracy.

Achievement:

- **Troubleshooting:** Successfully resolved a critical issue in a complex automation workflow, reducing downtime by 50% and improving system reliability.
- **Use Case Implementation:** Automated an end-to-end claim processing system, resulting in a 40% reduction in processing time and a 30% decrease in manual errors.

Education

- M.Tech in VLSI Design and Embedded Systems, VTU ,2021
- B.E in Electronics and Communication Engineering , AIET, VTU, 2019
- Diploma in Electronics and Communication Engineering, H.K.E'S Polytechnic, DTE, 2015.

Technical Skills

- **RPA Tools:** Blue Prism, UiPath, Automation Anywhere
- **Programming Languages:** C, C#, .NET, Python
- **Automation Platforms:** UiPath Orchestrator, Blue Prism Control Room
- **Database Management:** SQL Server, MySQL
- **Other:** Process Mapping, Workflow Automation, Agile Methodologies

Interpersonal Abilities

- Teamwork , Drive and Initiative
- Commitment to professional development
- Effective verbal and written communication
- Client engagement and collaboration
- Knowledge sharing and cross-cultural cooperation

Training and Certifications

- Python Essential Training- LinkedIn Learning.
- Infosys Certified AI and ML using LEX.
