

Sabarinathan Karthikeyan

Email: Sabarinathankarthick@gmail.com / Mobile: 91-8220203349 / [Linkedin](#) / Mainframe developer

Current Organization: SLK SOFTWARE,Bangalore

Career Objective:

An enthusiastic professional offering around 3.5 years of extensive and diversified experience in programming, coding and batch system analysis in Mainframe Technology. I'm currently designated as Software Engineer at SLK Software, collaborating with Fifth Third Bank for 2.11 years, on various solution approaches mainly focusing on Cobol, DB2 and JCL. Have predominantly worked in the banking domain. Looking forward to performing in an organization that enables me with plenty of opportunities to grow my technical skills towards the organizational vision and become a valuable contributor to the organization.

Skills:

- Understand the requirements and create design documents.
- Worked towards providing value add to customers in addition to client satisfaction.
- Create and execute test cases and follow up with application owner for approvals and sign offs.
- Creating all the required documents which includes coding, code promotion and implementation plans etc.
- Involved in project implementation and providing deployment support.
- End-to-end testing support with upstream and downstream applications.
- Solved production incident which included finding Root Cause Analysis of problem and maintaining details in Kanban for future reference.

Key Skills:

- **Programming languages:** JCL, COBOL.REXX
- **Database:** DB2
- **File System:** VSAM
- **Operating system platform:** Z/OS on IBM mainframe, Windows
- **Utilities and tools:** QMF, File Aid,Spufi,TSO/ISPF.
- **Debugging Tools:** IBM Debugger.
- **Tools:** Open text extreme tool, Putty, Stream differ,Winscp.

Work Experience:

Organization	SLK SOFTWARE
Role	Software Developer
Technology	Mainframe
Duration	January-2022 to Present

Project Name: Fifth Third Bank (US) - Dialogue Project:

Application name: Open text extreme tool. - The project was responsible for generating and delivering customer documents, letters, statements, refund cheques. The team was responsible for providing offline and online access to documents. Created JCL Step to send Postscript files with barcodes & 2D matrices MICR for checks to other servers for

Reprint/Recreate tasks. Worked on WinSCP app to verify the backend data Logs and using Putty tool. Involved in pre-execution checklist activities, like file backup on GDGs and definition of input files along with the variables to pass to the engine for the package are defined in a JCL step that executes the package and generates the PDF and Postscript files. Created dynamic job in JCL step that moves PDF files to server for the user validation of statements online. Have also taken over the product Abend support in absence of the onshore and respective team.

Contribution:

- Creating package and moving to Mainframe by using FTP to proper mainframe path.
- Request Work order to make mainframe components to stage for pre production verification.
- Creating Modlist to keep our mainframe components for mainframe Reserve mode. .
- Updating the Kanban Card once the testing is done from our end.
- Sending Reports to onshore clients on every monday.
- Updating control cards as per requirement.
- Involved in project implementation and providing deployment support as well as minimal code changes.
- Creating packages and preparing QA documents for client approvals.

Project Name: Fifth Third Bank (US) - Bank Card Issuer Project:

Worked as a Mainframe Developer with COBOL Language. Understanding requirements and developing COBOL programs for 5/3rd clients to run their daily process in production without any ABENDs. Development of code, Impact Analysis, analyze using DEBUGGER tool to meet the requirement. Testing is done to confirm fix- unit, regression tests. Updating the ECIF-ID, Flag values in E-docs Database by SQL Query using AQT tool.

Contribution:

- Resolved critical production issues, ensuring service availability. Provided technical support to other developers.
- Worked On Add to plan request.
- Creating invoices for Domestic and International countries.
- Worked on Duplicate abends and SOC7 abends and out of balance issues.
- Monitoring the production Jobs once it implemented in Prod.
- Involved in project implementation and providing deployment support as well as minimal code changes.
- Creating packages and preparing QA documents for client approvals.

Educational Qualification:

-
- Bachelor of Technology in Electronics and Communication Engineering from Vel tech engineering college, Anna university, Chennai in the year of 2020.

Certifications:

-
- Mainframe Certification provided by Tecsacon Technology.

Personal Details:

Father Name : Karthikeyan R, **Date of Birth :** 27/02/1998 **Marital Status :** Single , **Nationality :** Indian , **Languages Known :** English,Tamil,Malayalam,Telugu,Kannada and Hindi, **Hobbies :** Sports and Gym.
