Certification

- AZ-900: Microsoft Azure Fundamentals.
- AZ-204: Developing Solutions for Microsoft Azure.

Professional Summary

- **9+ years** of experience as a Software Engineer in Software development, Testing and implementation of web-based applications using Microsoft Technologies.
- Develop integration solutions including ETL process, REST APIs, Event Driven/Queue based integration solutions using Azure Integration Services.
- Experience in managing Azure Integration Services (**Azure Service bus, API Management, Key Vault, Azure functions, logic app, event grid, application insight, Azure Monitor, Azure Blob Storage**).
- Experience in Web Application development in **.Net Core, ASP.NET Core, Web API with C# as code behind language and SQL Server, ADO.NET, LINQ and Entity Framework for database connectivity**.
- Worked in Agile development Environment, with Scrum.

Skills

- **Microsoft Technologies:** .Net Core, ASP.Net Core, ASP.Net MVC, Web API, Entity Framework, LINQ.
- **Programming & Scripting Languages:** C#, JavaScript, jQuery.
- **Database:** MS SQL Server.
- **Version Control Tools:** SVN, GIT, Bit Bucket.
- **Development Tools:** Visual studio 2022
- **Project Management Tools:** JIRA, Azure Devops.
- **Azure Cloud:** Logic App, Function app, API Management, Service bus, key vault, app insight, event grid, event hub, azure monitor, IOT hub, storage account, cosmos DB, web job

Work Experience

Senior Software Engineer (Azure Integration Engg)

from 02/2021

Malomatia, Pune (IN)

- Estimation, solution design, detailed technical design, application technical deliverables including code, associated tests and documentation using Agile techniques.
- Adhere to software engineering best practices, delivering software products/applications generating business value.
- Developing Integration solution for the application using Logic app, Function app, Service Bus, API Management, Web API, C#.
- Handling the Azure PAAS Services Logic App, Function app, API Management, Service bus, key vault, app insight, event grid, event hub, azure monitor, IOT hub, storage account, cosmos DB.
- Support and Troubleshooting – Assist the Operations Team with any environmental issues that arise during application deployment.

Achievements

- Awarded Employee of the Month (April) 2017 in NeoSoft Technologies.
- Awarded Performance of the Year 2016 in NeoSoft Technologies.

- Photography

Senior Software Engineer

02/2020 - 02/2021

Persistent Systems, Pune (IN)

- Estimation, solution design, detailed technical design, application technical deliverables including code, associated tests and documentation using Agile techniques.
- Adhere to software engineering best practices, delivering software products/applications generating business value.
- Developed Web APIs for the application using .Net Core Web API, C#, SQL Service as a database and Develop testing and validation processes using Test cases.
- Developing Integration Solution using Azure Function App, Logic App, Service Bus, Key Vault.
- Support and Troubleshooting – Assist the Operations Team with any environmental issues that arise during application deployment.

Engineer – Product Development

06/2018 - 02/2020

FIS Global Solutions,
Pune (IN)

- Functional software development for web-based application using .Net framework, .Net Core, WCF, Web API, Cognitive service.
- Coordination with QA team for bug fixing and troubleshooting.
- Requirements analysis Finance based treasury system application,
- Software architecture with Enterprise Architect,
- Agile (Scrum) based planning, specification and documentation of new features for the applications.

Software Engineer

06/2016 - 06/2018

NeoSoft Technologies International,
Pune (IN)

- Involved in requirement gathering and requirement analysis, Project architecture design, Database design.
- Creating Web API using .Net core as c# as code behind language, and using SQL server in database connectivity.
- Agile (Scrum) based planning, specification and documentation of new features for the applications,
- Requirements analysis for application modules.

Software Engineer

03/2015 - 06/2016

Maven Tech Services, Pune (IN)

- Involved in requirement gathering and requirement analysis, Project architecture design, Database design.
- Creating Web Forms in .Net Framework as c# as code behind language and using SQL server in database connectivity.
- Agile (Scrum) based planning, specification and documentation of new features for the applications,
- Requirements analysis for application modules.
