Vosenco Travel Tech

Senior Technical Architect - AI

2024 - Present | Paris, Bangalore

- Designed the Architecture of the platform/application which will identify, predict and generate personalized trips based on each user's travel personas which includes identification of database, ML recommendation model and Conversational bot
- Implemented automated engine using web crawlers and fine-tuned LLMs to generate the personalized contents of each destinations, tours, trips, accommodations, itineraries, hotspots
- Leading the AI vertical of the Organization which includes creating the AI roadmap and its integration to business verticals, identification of potential areas of implementations and its ROI, hiring and managing the team of Data Scientists and ML Engineers

MiQ Digital India

Lead Data Scientist

2020 - 2024 | Bangalore

- Developed a multi objective optimization model to optimize the bid prices for each ad auction considering set of feature combinations which reduces the Cost per million, maintains the impressions served and improves Cost per Acquisition resulting in more than \$8 Million savings and 1000+ trader hours saving
- Developed and deployed an end-to-end recommendation model which used NLP, t-SNE and Topic modelling to recommend specific cohort of geo-contextual features to reach precise target audience which helped in achieving 48% higher conversion rate at 28% reduced Cost per million
- Led a team of 3 Data Scientists to develop two models to replace IP address based retargeting using pattern mining algorithm and geo spatial clustering hence increasing the audience engagement two times, reducing Cost per Million for ads serving by 60%, covering 75% of the targeted IPs, 5 times higher scale and shielding organization's revenue of \$10 Million

Accenture Solutions

Senior Data Scientist

2015 - 2020 | Bangalore

- One of the two engineers who built NLP chatbot for the UK Telecom major to revert to the order and appointment updates of the agents to provide with current status and exact resolution time which reduced the work around time by two days, dependency on different teams and average response time
 - Implemented the Information retrieval model to assist call center agents in addressing the incoming customer calls for a US telecom major by creating Virtual Agents which extracted relevant answer to the customer questions which helped organization to reduce their workforce in customer service center by 20%
-

Skills

- Python (NumPy, Pandas, Scikit-learn, Keras, Flask, FastAPI, HuggingFace, Pytorch)
 - SQL (MySQL)
 - Statistics, Machine Learning, Neural Networks
 - Natural Language Processing, Large Language Models
 - MLOps, AWS
 - Recommendation Engines
-

Education and Certificates

B.Tech, Electronics and Telecommunication

Kalinga Institute of Industrial Technology

2011 - 2015 | Bhubaneswar

MicroMasters, Statistics and Data Science

Massachusetts Institute of Technology

2020 - 2021 | Cambridge

CECP Certificate Program, Quantum Computing and Machine learning

Indian Institute of Technology

Jul,2022 – Dec,2022 | Delhi

Publications and Awards

- Mentor to MIT's AI and DS courses on Great Learning, delivered more than 25 sessions
- Two Research paper published on the topic of "Privacy-Preserving Geography Based Behavioral Attribute Segmentation using Pattern Mining" and "Cookie-less Predictive Targeting in Programmatic Media using Topic Modelling in IEEE ICDM 2022 and IEEE PRML 2023
- Medium blog on "Geo-Contextual approach to Cookieless Future". Link: <https://medium.com/miq-tech-and-analytics/geo-contextual-approach-in-cookieless-future-f7ee5a617f07>
- Second Runner-up Bayer's Digital Integrated Label Hackathon, winner of 3 internal hackathons and Datathons, 3 Quarterly Individual awards and 2 Annual award
