Summary

Experienced Oracle APEX Developer with nearly 1 year of expertise in designing, developing, and deploying scalable web applications using Oracle APEX. Proficient in PL/SQL, JavaScript, and SQL for building dynamic and data-driven solutions. Proven track record of migrating legacy systems (OAF, D2K) to APEX, optimizing business processes across supply chain and finance modules.

Skills

Languages: PL/SQL, JavaScript, Python.

Key: Oracle APEX, PL/SQL, Oracle EBS.

Experience

Oracle Apex Developer | Altus Mindstream Innovation pvt ltd | Feb 2024 - Present

- Proficient in designing and implementing solutions using Oracle APEX to meet business requirements and enhance user experience.
- Managing and developing database projects adhering to organization's methodologies and procedures. Microsoft Excel (Data analysis), Database Management (SQL).
- Skilled in creating custom applications, reports, and forms, as well as optimizing performance and ensuring security. Strong understanding of Oracle database technologies and cloud deployment strategies.

Data Analyst | Aiva Martech | 08/2021 – 12/2021 (INTERNSHIP)

- I have worked as data analyst for sourcing data from variety of sources to combine and analyze to generate insights.
- Optimize and execute business interventions to uplift customer engagement and business performance.

Projects

GATE ENTRY APPLICATION - Oracle APEX Application (Mar 2024 – June 2024)

Developed a Gate Entry Application using Oracle APEX, integrated within the supply chain module to streamline the entry and exit of goods at facility gates. The application enables efficient management of vendor receipts, delivery notes, and shipment tracking, ensuring real-time data capture for goods movement and inventory. Key features include an interactive grid for data entry, validations, approval workflows, and dynamic reporting for better decision-making and operational transparency. Leveraged Oracle PL/SQL for backend logic and dynamic actions to enhance user experience.

OAF to APEX migration - Oracle APEX Application (June 2024 – Aug 2024)

Migrated key financial processes from Oracle Application Framework (OAF) to Oracle APEX, improving performance and user experience. Rebuilt invoicing, payments, and ledger management functions using APEX's dynamic forms and reports. Integrated PL/SQL for business logic, ensuring seamless data transition and enhanced application accessibility for finance teams.

D2K to APEX migration - Oracle APEX Application (May 2024 – Sept 2024)

Migrated a supply chain application from Oracle Forms (D2K) to Oracle APEX, enhancing system usability and performance. Reengineered processes like inventory management, order tracking, and vendor management using APEX's interactive grids and reports. Integrated PL/SQL for seamless data processing, improving workflow efficiency and user interface.

Education

- 2023 | Master of computer application | D.Y Patil university, Pune.
- 2021 | Bachelor of computer application | Institute of management Kolhapur.

Certifications

- Oracle Apex foundation
- SQL and database design (Udemy)
- Python for machine learning and Data science Master class (Udemy)
