- WordPress
- Shopify
- Webflow
- JavaScript
- JQuery
- Html
- CSS
- Bootstrap
- SQL
- GIT

Interpersonal Skills

- Always ready to learn new technologies.
- Ability to build rapid trust and relationships.
- Adopt with different situation.

Experience Summary

Overall, 3.6+ years of IT experience in designing, coding and delivering enterprise applications. I adept in bringing forth expertise in design, installation, testing and maintenance of software systems. Proficient in various platforms and languages. Experienced with the latest cutting-edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

- 3.8+ years of experience in Full stack development using react.js, next.js and php.
- In-depth knowledge in designing database architecture and business logic implementation and very well experienced about code standard, business standard, and test cases.
- Mentored junior developers and conducted knowledge-sharing sessions on best practices in full-stack development, react.js, next.js and php.
- Ensured compliance with industry standards and regulations by conducting regular security audits and vulnerability assessments
- Showed my skills and Excellency on more than 8 projects.
- Did my bachelor's in technology in TAT Odisha and intermediate in Maharishi College of Natural Law Bhubaneswar.
- Received 2 awards for excellence in project execution, innovation, and technical proficiency.

Relevant Experience

- Developed and maintained scalable backend services using Php, ensuring high performance and responsiveness for user-facing applications.
- Implemented APIs in PHP, facilitating seamless integration with front-end components and third-party services.
- Implemented security best practices in both frontend and backend development, including data encryption, authentication, and authorization mechanisms.
- Ensured compliance with industry standards and regulations by conducting regular security audits and vulnerability assessments.

Work Experience

May 2023 – TILL DATE

Web Development Project Lead, Ralecon, Bangalore

Projects

- mitonlineindia: MIT Online India is part of the MIT Group of Institutions, offering online education programs in various fields. It aims to provide accessible, high-quality education to students across India and beyond, leveraging technology to enhance learning experiences.
- Mitidindia: MITID focuses on design education, offering undergraduate and postgraduate programs in various design disciplines. It emphasizes creativity, innovation, and practical skills, preparing students for careers in design.
- TSRA, TSUS, bcshetty : Building full-stack projects using PHP and frontend technologies like html, css, bootstrap, JavaScript, jQuery and ajax can be a great way to learn both client-side and server- side development. Here are a few project ideas that can help you get hands-on experience with these technologies.
- CRMU, CMRIT, Ekya, Brigade Hospital, tsra, tsus, edudunia : Using WordPress, Elementor, and PHP together can result in a variety of interesting and useful projects. Here are some ideas that might spark inspiration. Build a fully custom WordPress theme from scratch, incorporating Elementor for page building flexibility and PHP for backend functionalities.
- GIIS: Webflow is a popular web design and development platform that allows users to create responsive websites visually without needing to code. It combines a visual editor with the ability to generate clean HTML, CSS, and JavaScript.

July 2021 - November 2022

Software Developer, Silicon Techlab, Bhubaneswar

Projects

- LMS : Creating a Learning Management System (LMS) using PHP for the backend and various frontend technologies involves integrating multiple components to ensure a seamless user experience. Here's a detailed breakdown of how to approach this project, including both backend and frontend aspects. Build a web-based Learning Management System that allows users to register, enroll in courses, participate in classes, submit assignments, and receive grades.

October 2020 – July 2021

Software Developer, 3sd solutions and services Pvt ltd, Bhubaneswar

Projects

- Creating a website involves several steps, including designing the layout, developing the functionality, and coding the front end and back end. Here's a basic guide to design and develop a simple website using HTML and PHP.
- Developing a CRM (Customer Relationship Management) system using CodeIgniter involves several steps, from setting up the environment to creating features like contact management, sales tracking, and reporting. Below is a high-level guide to get you started, including key steps and sample code snippets.
