SUMMARY

As a passionate DevSecOps Engineer, I'm driven by a desire to create secure and efficient systems that enable businesses to thrive.

KEY ACHIEVEMENTS

- **Skill Development:** Spearheaded **Terraform training initiative**, elevating infrastructure automation proficiency across TCS team and driving measurable efficiency gains.
- **Prestigious Client Engagement:** Handpicked for mission-critical role with Fortune 500 financial services client, outperforming peers in TCS's competitive internal selection process.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services(TCS)

May 2022 - Feb 2024

Building on Belief

Devsecops Engineer (Leading Financial Services & Retail Sector Clients)

- Gained comprehensive knowledge of the Software Development Life Cycle (SDLC), from requirements gathering to deployment.
- Optimized **CI/CD pipelines** for microservices deployments, ensuring troubleshooting and issue resolution using GitOps principles.
- Configured serverless Kubernetes clusters on **AWS EKS** for scalability and high availability; deployed custom EC2 instances for control and data planes.
- Led **DevSecOps initiative**, integrating security into CI/CD pipelines, 60% vulnerability reduction, and secrets management via AWS Secrets Manager and HashiCorp Vault.
- Increased admin team productivity by **35%** through customised **Ansible Playbooks**.
- Optimized CI/CD pipelines using Jenkins and deployed Java applications into **wildfly**, **Glassfish** and **Apache Tomcat** Servers in both windows and linux.
- Optimized CI/CD pipelines using Jenkins and containerized images using container runtime Environment Docker and moved to AWS **ECR** and deployed in **ECS**
- Containerized multiple microservices using **Docker**, integrating with existing CI/CD pipeline for automated deployments across multiple environments (dev,staging,Prod)
- Enhanced **Infrastructure as code(Iac)** practices using Terraform and Ansible to manage cloud resources automate provisioning and maintain environments
- Streamlined global application rollouts across 36+ countries, implementing **blue-green deployments** and **canary releases** to achieve 99.9% uptime and minimize downtime, while **improving deployment frequency by 20%**.
- Designed Implemented and managed CI/CD pipeline using **AWS CodePipeline**, **AWS CodeBuild** and **AWS CodeDeploy** and automation of the java applications (Integrated **BitBucket** and **AWS CodePipeline** and automated the deployment in **Elastic Beanstalk**).
- Designed and implemented a fully automated Kubernetes cluster using **Kops** on AWS enhancing application scaling and resiliency across multiple environments.Utilized **Persistent Volume Claim(PVC)** to manage dynamic and static storage with AWS EBS for stateful applications

TECHNICAL SKILLS

- **Cloud Services:** AWS
- **Containerisation, Orchestration:** Docker, Kubernetes, Helm & Amazon EKS.
- **CI/CD & Version Control:** Jenkins, AWS CodePipeline, Git & ArgoCD.
- **Infrastructure as Code:** Terraform & CloudFormation.
- **Configuration Management:** Ansible.
- **Scripting & Automation:** Shell/Bash.
- **Monitoring & Logging:** Prometheus, Grafana & CloudWatch.
- **Operating Systems:** Linux (Ubuntu, Fedora & Centos) & Windows.
- **Networking & Security:** Subnetting, VPC, Subnet, Load Balancer, Route 53, IAM, SSH, VPN & Firewall,.
- **Advanced Networking Defense Systems:** Cilium, Istio(within Kubernetes for service mesh & network policies).

EDUCATION

Bachelor of Technology.

Majors: Computer Science.

GITAM (Deemed to be University) (2017-2021).

CGPA: 7.87

CERTIFICATIONS & ADDITIONAL INFORMATION

AWS Certified Cloud Practitioner.

Linguistic Repertoire: English, Telugu.
