PROJECTS

BankOS (Banking Services Product)

- ▣ **Project Description** - BankOS platform by Finzly is a cutting edge banking platform engineered to meet the evolving needs of modern financial institutions. It primarily focuses on transaction and account management from the banking employee's perspective.
- ▣ **Roles and Responsibilities** -
 - ▣ Led the customisation and integration of Finzly banking product for various clients, ensuring alignment with their unique business processes and requirements.
 - ▣ Collaborated with business analysts to gather requirements and design solutions for integrating banking products.
 - ▣ Integration of core banking systems with third party applications and services to meet client requirements and enhance operational efficiency.

BankRush

- ▣ **Project Description** - A web-based solution that enhances customer experience by allowing users to book slots for specific banking queries. The platform streamlines customer flow, reduces wait times, and optimizes resource utilization, ensuring a more organized and efficient banking experience.
- ▣ **Roles and Responsibilities** -
 - ▣ Analyze the program to identify the code changes as per the business requirements
 - ▣ Preparing the technical specification document based on existing system and new design changes.
 - ▣ Preparing and maintaining entire documents for projects.

Inkbeep

- ▣ **Project Description** - An e-commerce platform offering seamless product discovery with intuitive navigation and a modern, engaging interface. Features secure payment options like online banking and cash-on-delivery, ensuring flexibility, with a focus on performance and reliability for a smooth shopping experience.
- ▣ **Roles and Responsibilities** -
 - ▣ Participates in full development life cycle including requirements analysis and design.
 - ▣ Involved in knowledge sharing activities with team.
 - ▣ Producing and consuming the restful web services.
